Lunch Available Sale Day at the Fairgrounds

Dear Valued Customers,

On behalf of the Directors of the OK&T Angus Breeders Association, I would like to invite you to our 81st Annual Bull and Female Sale. This sale is one of the oldest, longest lasting consignment sales in the nation. Our directors take pride in finding and retaining quality consignors that produce a consistent and reliable product year in and year out. Some of our consignors have been with this sale for 23+ years.

The OK&T Angus Breeders Association Bull & Female Sale offering maintains one of the strongest sets of 18 to 24 month old bulls consistently offered through this region. Our consignors maintain the experience and knowledge to correctly develop these bulls, producing products that are ready to go to work on larger herds and in larger pastures. The use of Genomic Enhancement has also been implemented through our rules and regulations, adding another level of value and consistency for our valued customers.

Whether you are looking for heifers bulls, bulls that add pounds and end merit, or bulls that add style with show prospect producing potential; the OK&T Angus Breeders Association Bull & Female Sale will have something that will work for you. We invite you to come and evaluate our offering on February 16th, and discover the hidden potential this sale offers you!

Sincerely,
Joe Hite
President

2021-2022 OK&T Officers and Directors

President: Joe Hite - Valley Center, Kansas
Vice-President: Robert Park - Orlando, Oklahoma
Secretary-Treasurer: Dennie Jenkins - Gage, Oklahoma

Directors: Mike Molitor, Zenda, KS; Joe Hite, Valley Center, KS; John Kutz, Alva, OK; Robert Park, Orlando, OK; Clarence Frey, Mulhall, OK; Mike Harris II, Yukon, OK; and Braden Naylor, Balko, OK

**Defects are notated under tattoo number. Bulls are fertility checked and Trich tested.*

What's a bull worth?

Cowman Formula

Increase in pounds per calf from a top-performance bull

- X No. of cows bred to him per year
- X No. of years to keep the bull
- X Expected selling price of calves
- = Additional dollars you can pay for a better bull

Example: A bull who will add 30 lbs. to the weaning weight of each of his calves mated to 25 cows per year for 4 years and you sell the calves for \$1.50 per pound.

$$30 \times 25 = 750 \times 4 = 3000 \times 1.50 = \$4,500$$

This bull is worth \$4,500 more than the average bull who will keep your weaning weights the same. Take this formula and put your own figures in and see what you can afford to pay. This equation does not consider the increase in value due to calving-ease, higher quality replacement heifers, yearling growth, feedlot gain and improved carcass quality.

H01 is a powerfully, deep bodied son of Enhance out of a Vintage Blackbird granddaughter of the great Sandpoint Blackbird 8809 cow, who is the second high selling cow in the Angus breed with a valuation of \$500,000. This bull has an absolutely stacked pedigree that generates an EPD profile with 16 traits in the top 20% for the breed and 9 individual traits in the top 10% or better including 5 of the 6 \$Values. H01 had an outstanding weaning weight of 815 and an impressive yearling weight of 1312 with a -0.2 BW EPD. He is a bull that can move any program forward with both phenotypic and genotypic ease. You can't go wrong with this standout.

H25 is a stylish, eye appealing bull with a double shot of the great Basin Lucy 3829 who is the granddam of Basin Payweight 1682 one of the most popular and heavily used Angus bulls in the breed over the last decade. He has a powerful EPD profile with 12 traits in the top 25% of the breed including WW, YW, \$W and \$C in addition to an impressive adj. weaning weight of 747 pounds. In the recent Green Springs Performance bull test in Nevada, MO. He has a WDA ratio of 112.1 and an IMF ratio of 104.8. He offers both an exceptional phenotype and genotype that will enhance any program and with a BW EPD of 0.4, he could also be easily used on heifers.

The Livestock Marketeers met for their 53rd Annual Banquet at the National Western Club on February 1. Pictured (l to r) Neil Orth, Sonny Booth, Tim Lackey, Mark Smith, Doug Paul and Guy Peverley.

Livestock Marketeers Induct Two Into Hall of Fame

DENVER, CO.—The Livestock Marketeers — an informal fraternity of livestock fieldmen, auctioneers, sale managers and related livestock business leaders — met for their 53rd Annual Banquet at the National Western Club on January 13th. The event was hosted by American Live Stock; master of ceremonies was J. Neil Orth, executive vice president of the American International Charolais Association and 1984 Hall of Fame inductee.

The Livestock Marketeers group was formed in 1965 by Harry Green, Ross Miller and Claud Willett. Their purpose was to establish a fraternal organization of livestock professionals, and to make annual awards to encourage younger members of the industry to succeed in their chosen profession.

Tim Lackey
Tim Lackey grew up showing and selling Hereford cattle on his diversified family farm in Shelby, Mo., where he was very active at the local and state level.

This college career was interrupted a year when he was drafted by the U.S. Army. After his tour of duty in Germany, he returned to the University of Missouri to graduate in Animal Science. While attending Missouri, he was inducted into the Alpha Gamma Rho Fraternity. He was a 2nd high individual at Louisville and a 2nd high individual at Louisville. Quickly joining the workforce of the Drovers Journal in 1978 when of Missouri for nine years. In 1991 to spend more time on his farm with his brother Kerry they raised and 120 cows. Tim has stayed in circles as he covers sales for as well as real estate auctions.

Tim plans to continue raising his side as long as he is able.

Mark Smith
Mark Smith was born in Missouri, and attended Jefferson College in 1974. In 1978, he graduated from the University of Missouri with a degree in Animal Science. While at Missouri, Smith participated in the Livestock Judging and the Drovers Journal in 1978. Upon graduation in 1978, he worked for the OCA Ranch Rodeo for twelve years competing with one goal: to support the Children's Hospital Foundation (CHF). "The OCA Ranch Rodeo has raised more than \$531,000 for CHF since 1997, to help fund children's

McPhail Land And Cattle Wins Champion Honors At The OCA Ranch Rodeo While Raising Funds For The Children's Hospital Foundation

OKLAHOMA CITY, OK.—McPhail Land and Cattle won champion team honors at the 36th Annual Oklahoma Cattlemen's Association (OCA) Ranch Rodeo, which was held at the McPhail Ranch in Oklahoma. The 2020 event is the 7th year that the McPhails have participated in the event. The cowboys riding for McPhail Land and Cattle, headquartered out of Mountain Park, Okla., include Dayton McPhail, Dane McPhail, Dagan McPhail, Rowdy McFall, Darren Baker and Miles Baker. This win qualifies McPhail Land and Cattle to compete at the Working Ranch Cowboy Association National Finals this fall.

"While winning Champion honors is exciting, the OCA Ranch Rodeo is twelve teams of cowboys competing with one goal: to support the Children's Hospital Foundation (CHF)," said Weston Givens, Chairman of the OCA Ranch Rodeo Committee.

"The OCA Ranch Rodeo has raised more than \$531,000 for CHF since 1997, to help fund children's medical research and treatment for children right here at home in Oklahoma.

The winning team did not take home much more than bumps and bruises.

"The camaraderie among the ranch teams, paired with our mission... 'Cowboys Helping Kids' makes participating worthwhile and enjoyable," said Givens. "Ranchers have a built-in instinct to care for others. We care for our land and animals and produce safe and nutritious food that nourishes people around the world. So, participating in this event to raise funds for the Children's Hospital Foundation is not only natural for the cowboys, but it's heartfelt."

The 2020 participating ranches include: Alfalfa County Land & Cattle, Cherokee, Okla.; Gray G Bar, Shidler, Okla.; Buford Ranches, LLC, Hominy, Okla.; Stuart Ranch, Waurika, Okla.; Drummond Land & Cattle Co., Pawhuska, Okla.; Hall Ranch & Daube Cattle Co., Comanche and Ardmore, Okla.; Treddwell Land & Cattle, Frederick, Okla.; Chain Ranch, Canton, Okla.; Lazy Rafter Slash Ranch, Lenap, Okla.; Trentman Ranch, Pawhuska, Okla.; and Stierwalt Ranch & Cattle Co., Shidler, Okla.; Whitmire Ranch, Delaware, Okla.; and McPhail Land & Cattle, Mountain Park, Okla.

The Trentman Ranch and Stierwalt Ranch and Cattle Co. team was presented the reserve Champion.

Pork Exports Trend Lower In June But Remain On Record Pace; Another Tough Month For Beef Exports

June exports of U.S. pork fell below year-ago levels for the first time this year but exports remain on a record pace in 2020, according to data released by USDA and compiled by the U.S. Meat Export Federation (USMEF). Beef exports were down sharply from a year ago in June, reflecting a lingering impact of a temporary slowdown in beef production combined with restrictions on foodservice and weakening economies in major import markets. June lamb exports trended higher, posting the second largest totals of 2020.

21st K-State Beef Stocker Virtual Field Day Scheduled For October 1

MANHATTAN, KS.—Making alternative ration ingredients changes work, beef cattle market outlook and nutrition, management, and economic aspects of limit feeding are among topics planned for the 2020 Kansas State University Beef Stocker Virtual Field Day on Thursday, Oct. 1. The conference will be hosted on the Zoom webinar platform. "Due to increasing concerns around this evolving situation and standing by our commitment to keeping the safety of our participants, volunteers and partners as our top priority — we've made the decision to transition this year's Field Day to an online format," says Dale Blasi, K-State Animal Sciences and Industry professor and beef cattle extension specialist. "Like previous years we will still provide the latest information on marketing, nutrition, health and technology for attendees to apply to their operation just in a little different format this year."

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 10-36 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	26	Heifer Pregnancy	17
Birth Weight	23	Calving Ease Maternal	20
Weaning Weight	27	Milk	36
Yearling Weight	23	Mature Weight	15
Dry Matter Intake	12	Mature Height	9
Scrotal Circumference	15	Carcass Weight	15
Docility	12	Yearling Height	17
Claw Set	10	Carcass Marbling	11
Foot Angle	10	Carcass Ribeye	17
		Carcass Fat	14

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen GeneSeek or the HD50k by partner Zoetis. These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs
