We have been excited about the potential of this Resilient from the get go. His dam is a flush sister to our high selling Midland bull in 2017, Deppe Endeavor 641, and many other top performers over the years. This cow family makes them high quality with lots of carcass merit. Calving ease growth bull with high ranking \$ values.

Calving ease Capitalist 316 son that offers top end growth and maternal values. The dam is a maternal sisters to 10 Midland graduates selling to progressive breeders throughout the country. This pedigree reads deep in quality.

Deppe JA Blackcap 1250 - Maternal Sister of Lot 207

Lot 207

This one is a stud. Out of our immortal Blackcap 6224 donor that passed at 15 years of age. Her progeny are powerful in their growth, super fertility and awesome in their build and design. Multiple maternal brothers have been high sellers at Midland and we feel this is the best she has produced. Great spread bull with great feet and carcass genetics with a proven pedigree.

Exceptional Cowboy Up son from the Pride cow family that has stood the test of time for over the last decade at Midland. A full brother was a Midland graduate last year and several flush and maternal brothers to his dam have highlighted many great Midland pens over the years. Take advantage of time tested, consistent genetics.

Really attractive son of Cash with lots of growth and maternal power. Stems from the very prolific Granger Pride 275 donor. Add power and substance to those feeder calves and valuable replacement females. His dam is a wonderful donor that mates well to a variety of sire lines.

Prime Cut son with an outcross maternal pedigree the excels in scrotal circumference and growth EPDs. Attractive in his design and balance while being backed by a dam with a great udder. Be confident in his ability to sire attractive cattle that weigh up when it's time to put a scale under them.

“... Just wanted to let you know we are absolutely thrilled with how (Blackcap) 785 is turning out for us. She is so docile and beautifully shaped. **We have 2 heifer calves out of her this year and they are some of the best we have ever raised.** Her natural calf this year is out of Growth Fund. Her embryo heifer is a Southern Charm. They are both March calves and growing like weeds. **Just thought I would let you know that your genetics are working out great in the desert! Thanks again.**”

It is with great enthusiasm that we invite you to our pens at the Midland Bull Test "Final Sort" Angus bull sale. We have assembled a powerful group of ranch-ready performance-tested bulls for your appraisal. Please join us in person in Columbus, Mont., or online at CCI.live on Friday, April 8, 2022.

Our goal has been the same since the beginning -- to produce performance-tested bulls and females that will accelerate and thrive in commercial and seedstock producers' herds.

DNA data and genomic information have been collected since 2008. We use extensive embryo transfer to grow and make rapid genetic improvement. Cattle must be sound, structurally correct with eye appeal. We believe in great cow families; females must have strong maternal traits, longevity and a docile temperament.

This is our tenth year of testing bulls at the granddaddy of bull tests — the Midland Bull Test. Since then, we are proud to have tested over 140 bulls with more than 90 percent making the "Final Sort". At Midland in 2015, 2016 and 2017, we had the champion weight per day of age bull for their respective groups, and in 2016, we produced the high indexing and best RFI (Residual Feed Intake) bull. In 2018, Deppe Angus produced the World Champion Pen of Bulls. 2020, we produced runner-up World Champion Pen. In addition to these awards, our daughters also consigned the Champion Junior bull over all breeds in 2016, 2018 and 2019.

Delivery options available • Contact us to learn more about free/low cost delivery

The Midland Bull Test has provided us the opportunity to objectively test our top bulls against more than 200 different breeding programs representing 32 states each year. The data on the bulls is used to help drive decisions that impact the development of our cow herd. When push comes to shove, the cows make the difference. Many full and maternal sisters to these bulls make up the future of our program.

The development of these bulls on a high-rough ration allows them to maintain their body condition and structural integrity in the breeding pasture. These bulls will hold up regardless of the environment presented to them. Thank you to Steve and the Midland crew for their diligent work in caring for, sorting and identifying the bulls that have "walked the walk".

We appreciate your interest in our program. If you have any questions or interest in viewing the offering prior to sale day, please contact me.

Best regards, Dennis Deppe
