160 Coming Two-Year-Old Registered Red Angus Bulls Will Sell!

5L RIPPED IN BLACK Z169-510B

REDHILL B571 JULIAN 84S

Welcome to our annual bull sale!

Thank you for your interest in our program. Bull sale time is one of the highlights of our year and we always look forward to meeting up with old and new customers. Getting the opportunity to speak with commercial cattlemen & cattlemen across the country is something we find great value in.

We breed these bulls to be able to fit the needs and demands of the commercial industry out making a living in the “real world”. These are the types of bulls that are going to last and breed their assigned cows' year-after-year; and ones that will sire easy fleshing, maternal females that profitable herds are built around. By having a strong emphasis in phenotype selection over computer generated EPDs, we stay focused on creating functional cattle that will flat out work. The strict breeding plans and matting strategists that has been put into these bulls is what separates them from the rest. Many in this offering our ½ or even ¾ brothers. We understand the importance of multi-trait selection for customers that are wanting to create practical cattle that convert forage into pounds. This is done by the consistency of line breeding and the use of proven cow families in our sire selection. This has also enabled us the ability to offer a large group of bulls that are uniformed. The genetic merit behind our bulls is going to shine when the progeny of them are marketed; for a large group of calves that are similar in their phenotype and genetic makeup sell for premiums. This goes the same way with consistency and predictability of your replacement heifers - knowing what to expect is something that allows our customers to have confidence in when buying their bulls from Calvo Family Red Angus.

Bull development is something we take very seriously. We feel as if it is more of an art and something that impacts how each individual bull is going to perform his entire life. Our offering of bulls has not been in a feedlot or been fed a hot ration to attain big gains. We develop our bulls slow and steady to create an honest appearance to ensure structural integrity and feet soundness. They were out on grass all summer, with plenty of room to “be bulls”. We like to develop them in similar conditions they are going to see out breeding cows. They have all been pastured together where everyone receives the same treatment. No special ration was given to poor performing bulls; for if they cannot perform under the same conditions as their contemporaries - they will be culled. We allow them to sort themselves out, and thus only the bulls with superior fleshing ability and structural correctness rise to the top. We strive to offer bulls that have met all the requirements and not been made out to be something they are truly not. We greatly appreciate the positive feedback we have received from our customers about the way our bulls have been able to perform year after year.

What to expect on sale day from the bulls:

We push to create a group that is uniformed and phenotypically attractive. We feel as if a bull is going to be a bull - he better look like it. Creating bulls that are masculine with real muscle and top shape; but yet one that is smooth made and free moving. We also put a strong emphasis on disposition, for we absolutely do not tolerate poor disposition bulls. Most of the ones in this offering qualify for the use on heifers; but we don't feel as if this has restricted the bulls in terms of power and shape. Over the years we have always selected the low birth weight bulls that have performed the best on grass all summer to clean up cows, or to even be used for natural service on a select group of females. We feel this has really started to show with the bulls we offer. Sacrificing pounds just to have an enjoyable calving season is a thing of the past. We calve in the months of May and June out on pasture. Cows and heifers are checked once a day while tagging calves; for it is very important to us that these cattle calve unassisted. However, it is just as equally important to us is the ability to perform and put on the pounds during the young stages of being on the cow. Because at the end of the day, most customers have to sell by the pound.

Again, thank you for your interest in our program. We look forward to seeing you on sale day!

God Bless,
The Calvo Family

Schedule of Events (CST)

Bulls are available for viewing any time
prior to the sale

Friday, February 25

8 am Cattle available for viewing
Coffee & rolls are served

11 am Lunch is served

1 pm Sale starts

Directions to the sale 87762 446th Ave., Bassett, NE 68714

Two miles south on HWY 20/183 of Bassett NE. Go one mile west on road 878 and turn left directly after the grove and black mailbox. Go ¼ mile south and turn left into the place. If you have any issues please call Rachael.

Retained Interest Calvo Family Red Angus is retaining one-half revenue of semen interest in every bull selling. Full possession and full salvage value sells on the bulls.

Lodging

Bassett Lodge & Café - 205 Clark St. Bassett, NE.....402-684-3379

Rodeway Inn - E HWY 20 Ainsworth, NE.....402-387-1050

Sandhills Guest Motel - E Hwy Atkinson, NE.....308-546-2206

Purchase Warranty We offer one full breeding season guarantee for any injury that would keep the bull from being a suitable breeder for the first breeding season. If a problem occurs, we will either give you a suitable replacement of the same value or you will receive full credit minus \$1,500 worth of salvage to be used on your next bull purchase. If an injury occurs we require that we are notified within 30 days of the injury and the bull be taken to a vet in order to receive credit or a suitable replacement. We also reserve the right to a second opinion by a vet of our choice.

Delivery We offer free delivery on bull purchases for the first 700 miles and free delivery anywhere in the U.S. for bull purchases over \$20,000. Delivery for purchases under \$20,000 but over 700 miles will be at cost for only those miles over 700. We truly make every effort to get your bulls as close as possible, usually right to your place. However, since we haul multiple bulls on one load we may consolidate deliveries to one location in your general area. On some deliveries, we may ask you to meet our truck to lessen the time animals are in transit. Bring your trailer on sale day or pick your bulls up within one week of the sale and get \$100 off per bull!

Sight unseen purchases If you are unable to attend the sale, we will help you select bulls that fit your needs. Give us a call - 100% satisfaction is guaranteed on all bulls purchased sight unseen. To provide adequate time to assist you, please call us before sale day!

Online Sale Bull Videos

dvauction.com • www.calvofamilyredangus.com • Facebook: Calvo Family Red Angus

Online Bidding/Viewing Online bidding and viewing will be available through DVAuction. Please register and ensure high-speed internet connection prior to sale time. 402-316-5460

Insurance Insurance will be offered through Pelton Livestock. Calvo Family Red Angus HIGHLY recommends any bull purchase over \$7,000 to be insured. CFRA will pay half of the insurance cost for any bull insured for \$7,000 and over. Pelton livestock is located on page 5.

Bids can be placed with any of our representatives or ourselves. Please call ahead of time so that we can get you a bidder's number.

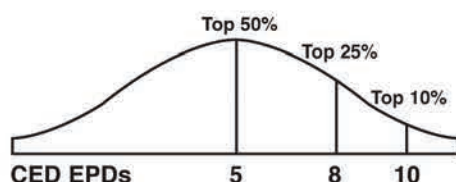

Calvo Family Red Angus is not liable for any injuries to those who attend the sale. All those who attend assume the risk associated.

Cowherd - Building

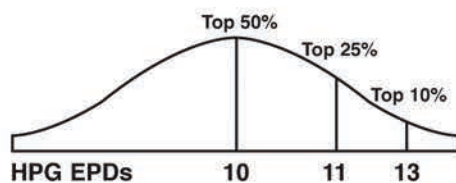

Profit starts at Reproduction!

Placing selection pressure on traits that will have a direct impact on your marketed product (weaned calves, yearlings, carcasses sold in the meat) can certainly increase your revenue on a per-calf basis. However, in order to achieve the higher goal of increased revenue per cow exposed, selection pressure must be placed on cowherd-building traits.

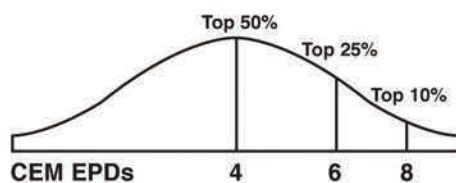

Red Angus' commitment to Total Herd Reporting allows for the measurement of each female's lifetime production history; from being exposed to breeding as a yearling, to measuring females' productive lifespan. Implementing these tools into your selection decisions will have a long-term impact on your operation's profitability.

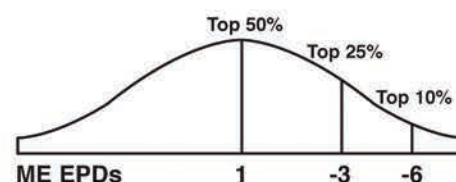

Calving Ease Direct (CED) - predicts the probability of calves being born unassisted out of 2-year-old heifers. Producers want live calves - born unassisted. Selecting on actual birth weight is flawed; it is influenced by non-genetic factors such as nutrition and weather (ambient temperature). While BW EPD removes these non-genetic factors, Red Angus' CED EPD is the best predictor of calving ease. The CED EPD includes variation in BW plus other influential genetic factors such as gestation length, calf shape, etc.

Heifer Pregnancy (HPG) - predicts the probability of heifers conceiving to calve at two years of age. Many breeds offer genetic predictions of yearling bull scrotal circumference as an indicator of age of puberty. While puberty is a prerequisite, many factors influence pregnancy rate. Red Angus' HPG EPD offers a tool which selects for what is economically relevant to ranchers - pregnant heifers.

Calving Ease Maternal (CEM) - predicts the probability of a given animal's daughters calving unassisted at two years of age. Replacement heifers should be able to calve on their own. Red Angus' CEM EPD offers the industry's most reliable prediction to address that concern. It includes not only the predisposition for a female to calve unassisted, but also her contribution to her calf's traits (birth weight, calf shape, etc.) that make it more likely to be born unassisted.

Maintenance Energy (ME) - predicts differences in daughters' maintenance energy requirements and is expressed in Mcal/Month. Recognizing that 70% of cowherd feed costs are burned up in maintaining weight and condition, Red Angus' ME EPD allows for the selection of bulls whose daughters will require less feed; thus, reducing cowherd expenses. Include selection pressure for ME EPD to ensure feed costs don't get out of line when selection is made for greater performance and production.

EPD percentiles reflect non-parent animals under two years of age

Traits

Excel in Stayability... Excel in Profitability!

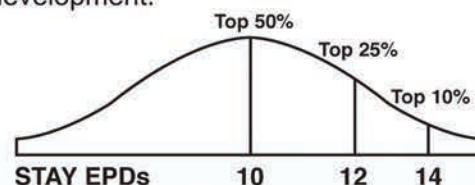

Improving Stayability enhances cowherd profitability by increasing the percentage of females that deliver pounds and value to the weaning pen without extra labor or feed – and do it year after year.

Red Angus' Stayability (STAY) EPD is a selection tool to improve overall cowherd efficiency through reducing replacement rate. Cows that stay productive, are problem free and last longer mean a larger percentage of heifers can be cash cropped, instead of developed as replacements.

How is Stayability EPD Calculated?

THR provides the foundation for a reliable Stayability EPD. Once a female enters the productive cowherd she is monitored annually for her productive ability. Only

Stayability (STAY) – predicts the probability of a bull's daughters remaining productive until at least six years of age. Why six? That's how long it takes a female to breakeven given all the expenses of development.

females that produce a calf every year up until at least six years of age are given a positive observation. Females that miss a calf or are culled for any reason including soundness, production, disposition, body condition, etc. are given a negative observation.

Mandatory collection of Stayability observations from all Red Angus herds provides ample data for the prediction of a bull's ability to sire Ranch-Tested – Rancher-Trusted cowherds.

EPD percentiles reflect non-parent animals under two years of age

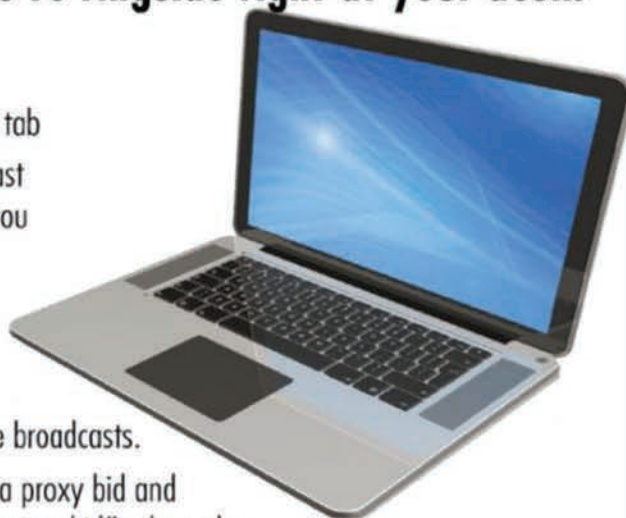

View the Auction Live! Bid Online... you're ringside right at your desk!

Buying online is as easy as 1, 2, 3...

1. Create an account at www.DVAuction.com under the "Register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction – a DV representative will notify you once you have been approved.
3. Tune in for the sale to may your purchases!

High Speed internet is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy-bidding – if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

For General Questions Please contact Our Office: 402-316-5460 or support@dvauction.com

We are not cattle multipliers... We are cattle breeders.

We do not breed for numbers, we breed for a specific brood cow. Our definition of a "brood cow" is a feminine female that carries natural fleshing ability, is structurally correct, has excellent udder quality, can wean off at least 50%, and still breed back early every year.

These cows allow us to keep our operating expenses low and increase our profitability.

To achieve this, we believe in only selecting bulls from proven cow families to use in our program. We are firm believers in linebreeding our cow herd. Line breeding allows us to strengthen our pedigrees and increase calf consistency with every passing year.

The value of knowing what to expect is something we rely on in our program.

Consistency & Efficiency = Profitability

At Calvo Family Red Angus, we breed cattle based on how they perform in a real world environment; and under the same conditions our customers are going to be operating under. We understand the challenges producers face day to day - so we operate our purebred cows the same way our customers are going to operate their commercial cows. It is because of the challenges so many producers face today is why we stress our breeding program and to breed for consistency. We linebreed our cattle, rather than chase fads or hype. Today's stakes are too high to go after something that is unproven and to simply hope for the best.

Red Angus Guide to EPDS and Indexes

ProS... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG..... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI..... Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG..... Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY..... Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT..... Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

Titan 64E is a unique individual that we have used heavily ever since he was a calf. He is a striking dark red bull. He has perfect black feet and is loaded with rib shape. We can't ever seem to get an updated picture of him for he is always out breeding cows in the spring and fall. He does an excellent job of stamping his progeny. The Titans are always dark red with lots of masculinity and rib shape. His mother Dana 452C is currently at Trans Ova in South Dakota being flushed.

"One of B571's greatest sons - 84s is one of the premier, proven calving ease sires in the breed, with an excellent spread from birth to yearling. Moderate in size, well-muscled and extremely correct, with excellent feet, legs, and testicles, and he has an exceptionally quiet disposition. He epitomizes what the breed is about and is without a doubt, a true herd builder" - Buffalo Creek Red Angus, February 2012 ARA Magazine

Out of 84 bulls of all breeds, Grazer's sire, BB Grazer 6242, was the highest gaining, forage tested, purebred bull at the 1992 Noble Foundation forage test. Occ Grazer 610Z has also proven himself to be a leading sire in the red angus breed for grass-based cattle. He will reduce your cow cost without sacrificing pounds per acreage. We feel his claim to fame is the females he leaves behind. We have a lot of daughters in production and they are as efficient as they come. They are moderate framed females with a lot of rib shape and natural fleshing ability. They are feminine made and have perfect udders. If you're looking for the type of bulls that are going to perform on grass and sire efficient females that wena a big calf off every year, these 610Z sons and grandsons are the ones to look at.

158H is one heck of a good Grazer son and if you know this bulls dam then you can understand why. She has been a featured cow on all of our platforms and is pictured on our website. This bull will thrive in a forage based environment and is one you'll want to keep all the daughters out of.

The amount of rib shape, fleshing ability, and power is what makes this sire exciting. His light color and slick hair makes him a very good candidate for southern heat. Forager's dam, 683A, is currently at Trans Ova being flushed because every year she passes that massive power and shape onto her calves. If you're looking for a bull to add fleshing ability into your cow herd in one generation, than look no further than 57E's sons.

These two white faced lock n load sons have been favorites of ours since they were born. 105H is a very unique individual by combining the maternal traits of Blockade, Easy Red, and the Vanessa cow family; and the heterosis, power, and performance from the Lock N Load's. Look to 105H to throw some serious pounds and uniformity onto your steer calves, and keep all the replacements out of him.

Easy Red 809W has been a bull that has left his mark in our program in more ways than one. He has a great ability to sire females that excel here on the ranch. They are easy fleshing with lots of look and power. We have about as many Easy Red daughters in production here on that ranch as any other sire.

There's no better way to start off the offering of Easy Red sons than none other than H248. This bull is a prime example as to why we preach line breeding in our program. If you're looking to add some serious fleshing ability, power, and capacity into your females then look no further. His dam is notably one of the best Easy Red daughters we have on the place and his grandmother is one we consider to be a foundational female. 1003D holds a 104 MPPA and a picture perfect udder. Herd bull prospect here.

DVAuction
Broadcasting Real-Time Auctions

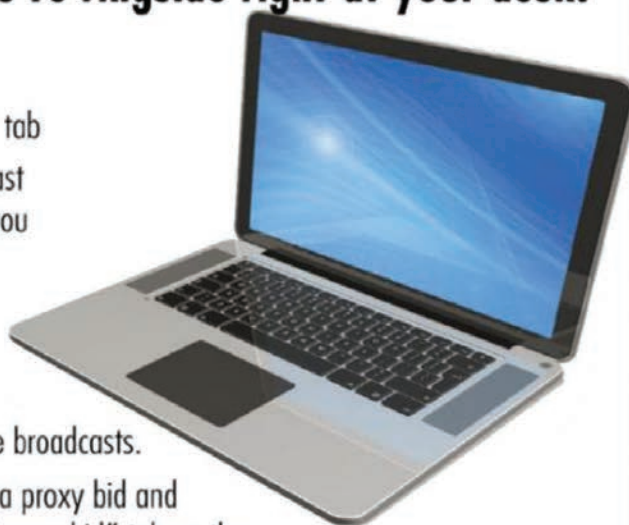

View the Auction Live! Bid Online... you're ringside right at your desk!

Buying online is as easy as 1, 2, 3...

1. Create an account at www.DVAuction.com under the "Register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction — a DV representative will notify you once you have been approved.
3. Tune in for the sale to may your purchases!

High Speed internet is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy-bidding — if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

For General Questions Please contact Our Office: 402-316-5460 or support@dvauction.com

The one thing with selling these bulls by sire groups is that you will find that there are absolute beasts like H265 as lot 149. One of my favorite bulls on the sale and out of one of my favorite females. If you're looking to add extra fleshing ability, pounds, and power to your cowherd then don't miss this Ripper calf.

H250 is one we used pretty heavy this spring and we feel he really held his shape well. He was one of the heaviest yearlings we turned out and we expect him to sire those extra pounds onto his calves. His dam, Pat 472C, is an exceptional female with a picture perfect udder.

In a league of his own, H268 is an extremely unique individual and if you take a look at his video it's easy to see why. His dam is a real soggy made female with an absolute perfect udder; and to top it off she holds a 112 MPPA. This bull exemplifies the qualities we strive for and is a true herd bull.

There is a Difference...

We do not breed for numbers, we breed for a specific brood cow. Our definition of a “brood cow” is a feminine female that carries natural fleshing ability, is structurally correct, has excellent udder quality, can wean off at least 50%, and still breed back early every year. These cows allow us to keep our operating expenses low and increase our profitability.

To achieve this, we believe in only selecting bulls from proven cow families to use in our program. We are firm believers in linebreeding our cow herd. Line breeding allows us to strengthen our pedigrees and increase calf consistency with every passing year.

The value of knowing what to expect is something we rely on in our program.
