Dennis & Jennifer Deppe and Family

Andy & Stacy Joos and Family

Chad & Carrie Gotto and Family

Eric & Dainna Smith and Family

Cliff & Christine Martin and Family

“We use Deppe bulls for the important traits like growth and marbling that they transmit onto their calves, but also for their structural integrity and longevity. The Upshot bull is nine this year and the Bismarck is seven. Both are still breeding and chasing cows twice a year.”

– Kendall Claeys, Belgian Acres, IA

# Progress Through Testing

BULL & FEMALE SALE

DEPPE ANGUS

Greetings!

Welcome and thank you for your interest in Deppe Angus genetics. We again have assembled a powerful group of performance-tested bulls and females for your appraisal. We invite you to our annual "Progress through Testing Bull and Female Sale" at our cooperating partner's, Andy Joos, family farm near Bloomfield, Iowa, on Friday, February 23, 2024.

Our goal has been the same since the beginning -- to produce performance-tested bulls and females that will accelerate and thrive in commercial and seedstock producers' herds. Our cattle consistently perform well in various environments, and our customers have come to rely on our genetics. This trust and satisfaction are what drive us to continue improving and expanding our operation.

The cow base has 25 years of documented, third party testing since we began testing in the Iowa Cattlemen's Association Test sale. In 2013, we began testing bulls at the granddaddy of bull tests --the Midland Bull Test in Columbus, MT. Over the past years, we have enjoyed much success in producing the high-indexing bull, the World Champion Pen of Three Angus bulls and numerous other awards. We are proud to compete with some of the best herds in the country at this test and offer genetics similarly bred to many of those in this offering.

In addition, Deppe Angus has raised females that have competed on the national level in the National Junior Angus Phenotype and Genotype Show (PGS). Animals entered in the PGS are evaluated by a judge under a system that requires both genotypes and phenotypes to be considered. The resulting placing is a composite score where the genotype (EPDs & \$Values) and phenotype are equally weighted. This is much like the criteria many bull and female buyers use when selecting their new genetics. We are proud to have raised both a division and reserve-division winners at the national level. The influence of these females is included in the offering.

Our success and ability to grow are due to terrific partnerships that we have formed with families in the Angus business. Andy and Stacy Joos of Joos Angus and their three sons farm in southern Iowa. Chad and Carrie Gotto farm with their five children in eastern Iowa near Dyersville. Eric and Dainna Smith and son, Dustin, farm in northeast Iowa near Decorah. Cliff and Christine Martin of Memphis, Missouri.

DNA data and genomic information have been collected since 2008. We use extensive embryo transfer to grow and make rapid genetic improvements. Cattle must be sound, structurally correct and have eye appeal. We believe in great cow families; females must have strong maternal traits, longevity and a docile temperament.

We will again host our sale using a live auctioneer with TV monitors in lieu of bringing the cattle through the ring. The bulls and females will be penned in an attached barn with plenty of light and space for your evaluations. Thank you to Foundation Feeders for their excellent ability to develop bulls with optimal growth and longevity in mind. All the bulls have been ultra-sounded, breeding soundness examined, and come with a first-breeding season guarantee.

We greatly appreciate the generous support of our repeat customers over the last 25 years and look forward to earning the business of new customers. Each year, more than 60% of our bulls are sold to repeat buyers. We appreciate your interest in our program. If you have any questions or are interested in viewing the offering prior to sale day, please contact me or Andy.

Best regards, Dennis Deppe

# DEPPE ANGUS – SELLING THE DEEPEST OFFERING IN THEIR HISTORY!

Welcome to the annual Deppe Angus – “Progress Through Testing” Bull and Female Sale – An event you will not want to miss. The Deppe family is as committed to breeding superior Angus cattle as any family in the business, and along with their partners, they will be selling the deepest offering in their history in 2024! There will be something for everyone, from the powerful bulls to a set of females to fit any progressive program.

This program is driven by the data and they believe in true performance testing. The bulls selling have been developed in a manner to express their genetic merit but in the right kind of condition to have longevity in your program. Genetically these bulls are backed by the “Who’s Who” of AI sires and offer a set of EPDs that all good cattlemen will appreciate. Once again, there will be several front-end bulls selling with purebred herd sire credentials and a set of bulls that will transmit extra pounds at weaning time for those in search of added pay weight – Calving Ease and Performance!

This will be the largest number of females ever offered and they are deep in quality. As we look forward in our industry there has never been a better time to invest in females. As many of you are aware we currently have the lowest number of cows on record and the market outlook is phenomenal...The key going forward will be to position yourself in this business by owning inventory! The Deppe females will provide the genetic merit and maternal traits cattlemen look for when building a strong base – And this year there will be volume to select from.

## Herd Health

Interstate health papers furnished on all cattle selling.

Bulls have been vaccinated with Inforce 3, Pyramid 5 Presponce, Alpha 7, Fusogard, Wart vaccine, autogenous pinkeye vaccine and have been wormed with Safeguard and poured with Cylence Pour-on Insecticide. All calves have been vaccinated with Calf Guard at birth and Nasalgen 3 PMH between 7 and 30 days of age. All breeding age females are on a modified live vaccination program using Bovi-Shield Gold FP5 L5 HB and Vision 7 Somnus with Spur, Endovac Beef and wormed with Safeguard and poured with Cleanup II. Pregnant cows have been given Scour Bos 9 and Vitamin E+AD. All Cattle over 7 months of age have been tested BVD-PI negative.

## Bull Guarantee

Our bulls have been managed carefully to ensure your success. All bulls will have passed a breeding and semen evaluation by AA Breeders and Services, LLC before being sold and/or delivered. The cattle are guaranteed to be fertile and reproductively sound in accordance with the recommendations of the American Angus Association. Bulls selling for \$3,000 or more are guaranteed against injury or infertility issues for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. If a replacement bull is available, he will be provided, or if the buyer prefers, credit toward one bull will be given in the following year’s sale season, less salvage value of the injured bull and prorated time of use. All injuries will require a vet inspection and please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. ALL CLAIMS MUST BE MADE BY OCTOBER 1, 2024. Replacement bulls are not covered by this guarantee. This is not intended to be a mortality insurance policy. It is recommended to purchase livestock insurance to mitigate this type of loss.

All of us in the cattle business are faced with as much positivity as we have ever seen! The time is right to invest in quality BULL POWER and MATERNAL EXCELLENCE - This large offering will have both! Position your program to take advantage of the strong market dynamics and make the genetic investment to reap the rewards in the years to come. It has been enjoyable to develop a relationship with Dennis and his Angus family as we share the same strong belief in the fact you can have it all – Cattle that are functional and easy to look at with EPD power to be attractive on paper. After all, in today’s world, these cattle need to have it all and at Deppe Angus you will find it!

Feel free to give me a call at (918) 510-3464 if you would like to discuss this offering. You will be able to bid online at DVAuction.com where video footage will be available for viewing prior to the sale. We look forward to seeing you the afternoon of February 23, 2024 in Bloomfield, IA.

## Post-Sale Bull Boarding and Delivery

**A \$200 discount will apply to all bulls picked up the evening of the sale** or the day after. Free board and delivery to surrounding states on bulls selling for \$4,000 or more. Delivery of bulls will start the week of March 11th. Delivery is also available to western states on our trip to the Midland Bull Test Station in early April.

We ask that females are picked up within a week of the sale.

We will assist with trucking arrangements and have reliable trucking options available.

## Fertility

All bulls 12 months or older have passed a breeding soundness exam performed by a licensed veterinarian. Such exam will be noted on the official Certificate of Veterinary Inspection or presented on a “Certificate of Fertility Evaluation.” All bulls less than 12 months of age are guaranteed by the seller to be fertile breeders. A breeding soundness exam prior to delivery will be conducted if housed with us after the sale.

## Off Test Data

Off test weights, ADG, Scrotal Measurements, adjusted IMF, REA and Back fat will be available at [deppeangus.com](http://deppeangus.com), [dvauction.com](http://dvauction.com) and the on-line sale catalog approximately one week prior to sale day and part of the sale day supplement sheet.

## Understanding EPDs

Expected Progeny Difference (EPD) is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus.

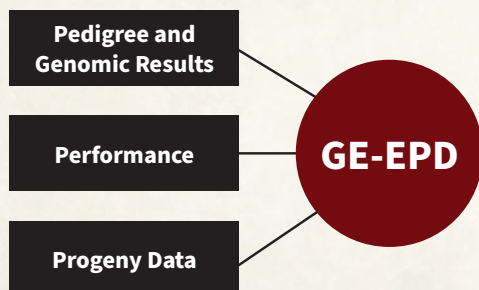

Genomic-enhanced EPDs are the best estimate of an animal's genetic value as a parent combining all available sources of information. Genomics permit higher prediction accuracies for younger animals and characterizes genetics for traits where it's difficult to measure the phenotype. To learn more about available genomic tests, go to <http://www.angus.org/AGI/default.aspx>

“EPDs are an excellent tool for producers to utilize and sort genetic variation among the breed’s gene pool and match relative economic traits to their operation’s goals, environment and resources.”

– Dennis Deppe

Trait	Percentile Rank	Observation
Calving Ease Direct	1%	More unassisted
Calving Ease Maternal	1%	More unassisted
Birth Weight	1%	Lighter

## EPD Definitions

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

**Docility (Doc)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

**Heifer Pregnancy (HP)**, is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Claw Set EPD (Claw)**, is expressed in units of claw-set score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal claw set. The ideal claw set is toes that are symmetrical, even and appropriately spaced.

**Foot Angle EPD (Angle)**, is expressed in units of foot-angle score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal foot angle. The ideal is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

**Pulmonary arterial pressure EPD (PAP)**, is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score. PAP score is an indicator of susceptibility to high altitude disease commonly experienced at elevations greater than 5,500 feet. Selection for this trait aims to improve the genetic potential for a sire's progeny to have lower PAP scores thus a lower chance of contracting high altitude disease increasing the environmental adaptability of cattle living in mountain areas.

**Carcass Weight EPD (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Maternal Weaned Calf Value (\$M)**, an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

**Weaned Calf Value (\$W)**, an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

**Beef Value (\$B)**, a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

**Combined Value (\$C)**, an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

## BULLS SELL IN CATALOG ORDER

**Lot 1**

**Deppe Bachel Beauty 020**  
Dam of Lot 1, Sells as Lot 195

**Deppe 928 Impression 518**  
Maternal Brother to the Dam of Lot 1

**Lot 1:** Growth Fund sons have been the staple of purebred and commercial programs for the past several years. This double digit calving ease bull is no expectation to the rule and leads off our offering for good reason. His second calf heifer, Dually dam, is a maternal sister to our all time high selling bull at The Midland Bull Test to Leo McDonnell and MJB Ranch. His birth to yearling growth spread is as impressive as his balance, pattern and structure. Dam sells as lot 195. Recommended for use on heifers.

A Congress son that has caught our attention each time going through the calves in the pasture. This stud prospect's donor dam is backed by the Blackcap cow family that has tested 15 sons at the Midland Bull Test where they have been high performers and sellers. Front-runner 3010 is the only bull in the Angus population with his combination of CED, YW, SC, MARB, \$M and \$C. In addition, He is a gain leader of our bulls on a 3rd party test. Recommended for use on heifers.

Impressive phenotypic and excellent growth son of Goalkeeper out of an impressive Dually daughter purchased from the GMAR program in Montana. Make sure to check out this moderate birth weight bull that is sure to make an excellent set of calves to feed out. Dam sells as lot 176.

### Bull Feeding Philosophy

“Foundation Feeders has been successfully developing bulls for purebred breeders for over 20 years now. Our philosophy has always been to develop the rumen with as much spring of rib as possible. We accomplish this by feeding a high roughage diet that consists of high levels of protein for muscle growth and high levels of mineral profile to promote health and fertility. We achieve rumen stretch when we tease them with energy. An animal will eat until they are physically full or have met their energy requirement. We want them to be physically full every day.

With a properly developed bull they will not crash out on pasture breeding cows and will have good feet and legs. They will thrive because they have the rumen capacity to eat enough forage to keep growing. If they were feed too much grain and tight gutted, they would lose weight on pasture and mobilize too much fat through the liver. Grain fed bulls show big gains but also have feet problems along with losing weight on pasture.”

- Ron Holty, Foundation Feeders, Inc.

Off the char s growth son of Incredible. This pounds heavy, age advantaged bull will sure please those wanting to add power and payweight to any set of calves. His donor dam is very prolific and we have retained many top end daughters the past several years. A maternal brother was the high selling bull in out 2021 production sale. Flush brother to lot 29.

Mission 340 is one to find many friends for his overall balance and power in a moderate birth weight package. His young, first calf heifer donor dam is one that every body finds in the pasture. I have said this before, the Mistress females don't miss. Excellent opportunity to incorporate some outcross, maternal bloodlines.

We made the decision to use Redemption on the Barbara 470 donor, and we got what we hoped for. This calving ease bull is easy on the eyes and has that herd bull presence of extra power and mass laid into a great structured skeleton. Outcross calving ease bull from a superior female. Recommended for use on heifers.

Iconic son stemming from the Blackcap 400 donor female that combines calving ease with carcass merit. His pedigree runs deep with great producing females with outstanding teat size and udder attachments. Here is one of the high gainers in the pen at interim. Recommended for use on heifers.

“We will probably collect and possibly picture the Lot 10 bull we purchased. We’ve had quite a few guys that seem to really like him. We cleaned up heifers with him-ran him with 80 heifers this summer and he held up well.”

- Text from DJ Buseman

Outcross genetics from a mating that gets it done anywhere they are used. The Matthews family in Utah have a flush sister that brings home the big calves each year off the desser . The addition of these excellent age bulls is to accommodate our customer base looking for more bulls that can cover larger groups of females in their first year of service. They have been raised on fescue in Northeastern MO, summered on grass and developed to work for years to come.

Son of Lot 100

**Deppe Barbara 3359**  
Daughter of Lot 100

**Available immediately for IVF**

Deppe FC Barbara 470 cow is the dam of Full Spectrum 160 who was one of the most talked about young sires to sell in Iowa in 2022 and today is a favorite of many that tour Nichols Cryogenetics. She has generated over 6 digits in progeny and embryo sales. She is an absolute beast from every angle you look at her. From the smooth blend of her neck into her shoulder and then to her massive sweeping rib. Moreover, this Beth Dutton of Angus cows stands on an impeccable foot and pastern set that carries her weight in an athletic free moving motion. At ten years of age, the power from her top, hip and lower quarter is second to none. Couple that with the fact that her calving ease, weaning and yearling growth EPD's and fantastic carcass valuation can't be matched by any other First Class daughter. Her mating flexibility is endless! She is the ultimate Phenotype and Genotype (PGS) donor cow that traces to the famous W C Barbara M84 donor at Anderson's Double Diamond Angus in Chrisman, IL. Check out her progeny selling and take advantage of this IVF cycle. She has been averaging 8-12 embryo viable frozen IVF embryos per cycle without the use of FSH. *Offering one IVF Cycle on this female with a guarantee of at least 6 embryos with the result of 3 pregnancies when embryos are implanted by a certified technician. Cost of flush and semen are buyer's responsibility. Flush to be conducted at TransOva Genetics. Can be completed as early as the week after the sale.*

**Available immediately for IVF**

Deppe Mistress 0419 was the crowd favorite and Division 4 winning female at the 2022 National Jr. Angus Show and the Reserve Division Senior Heifer at the Iowa State Fair for Kyle Deppe. The overall mass and power in this Dually daughter is exceptional considering how long and elegant is still through her front third and complete in her balance and profile. She is the kind of production female we strive for with her phenotype, production record and great set of genomically enhanced EPDs. The Mistress cow family has been something we have been breeding on and developing within our program for years and we have rarely released these genetics to the public. When we have, they are test station winners and sale toppers. Her granddam is a 13 year old cow that still is going strong in her production with 29 recorded progeny (AI or ET), with her last four calves having an average weaning ratio of 122. This is a rare and great opportunity to flush this truly unique, outcross female to the bull of your choice and create your own outstanding herd bulls or PGS show females. Her progeny by Baldrige Versatile, Magnum 3385 and Mistress 3224, highlight both the bull and female offerings. *Offering one IVF Cycle on this female with a guarantee of at least 6 embryos with the result of 3 pregnancies when embryos are implanted by a certified technician. Cost of flush and semen are buyer's responsibility. Flush to be conducted at TransOva Genetics. Can be completed as early as the week after the sale.*

DB Iconic G95 bull calf born on 12-20-23

The dam of the very popular Deppe Road Trip 2209 bull that was second high selling bull in last years sale selected by Belgian Acres, IA. They also own a daughter of Blackcap 637 that has entered their donor pen. She is very feminine and elegant in her pattern and design, yet has enough power to raise big stout, heavy muscled herd bulls. This Blackcap family knocks it out of the park year after year. The featured Front-Runner 3010 bull traces to the same dam as 637, Deppe 7229 Blackcap 244. Her bull calf at side is a full brother to Road Trip 2209. Froze 9 on her last flush.

Sitz Incentive 704H heifer calf born on 12-26-23

This sale attraction is hard to part with. Blackcap 574 is the dam of a great Cash daughter purchased by K Bar Angus Ranch, UT. Joseph & Bobbie Jo Matthews flushed her very successfully and raised the top selling bull at the "Bulls of the Border" bull sale in NV. Study the stacked performance pedigree of Top Game on our Blackcap 6224 donor. Her maternal sisters by Incredible and Discovery have been sale highlights in each of our production sales. In addition, pair that with a heifer calf by Incentive. I think this one screams COW POWER. Froze 9 on her last flush.

Fantastic PGS prospect from a former National PGS Division winner and is also a flush sister to the Magnum 3385 bull. It is darn tough to build an EPD profile this rock solid with the look, phenotype and consistency of genetics that she has in one package.

Beautiful Incentive daughter that has that extra classy Envious Blackbird look. Her young dam raised a Midland Bull Test graduate on her first calf. I anticipate that this young female will have much earning potential for years to come.

I really think these Incentive daughters have an exciting future ahead of them. Their bull mates have been impressive performers and have a herd bull look. This Incentive daughter is very feminine and maternal looking. The Georgina cow family is a staple across the country.

*E&B Wildcat 9402 bull calf born on 12-16-23.*

Full sister to PA Valor 201 that was used heavily in prominent herds throughout the country for his ability to generate heavy muscled, fast growing offspring. 2324 is ideal in her size and design. She is wide based and has lots of dimension down her top. This bull calf by the rare and popular Wildcat has lots of future.

Virginia Tech Statesman heifer calf born on 12-16-23.

Summation outcross female that has great earning potential. Her dam sold to Mc-Danolds Farms, IA where her daughter has found the donor pen as an early age due to her look and genomic package. This Statesman daughter could light up the grid. Pay close attention to this special lot.

Sitz Resilient 10208 bull calf born on 12-16-23.

I just really appreciate the length of bodied, big square hip and build of this Southern Charm daughter. She is a one of those females that is a little longer in her growth curve and will raise those big stout calves we all love to wean and feed.

*Wilks Regiment 9035 heifer calf born on 1-19-24.*

This is one of our favorite Iconic daughters produced last her. Your eye would always find her in the pen because of her sheer mass and power. Combine that with her EPDs and cow power pedigree, this one is a one to build a set of cows around. The added bonus is her the Regiment daughter at side. The work is done. Enjoy the potential in this one.

Virginia Tech Statesman bull calf born 12-14-23.

Highly maternal Pride daughter will earn her keep. She is and her Patriarch daughter are define sale highlights, We have populated this Pride cow family extensively so we can offer these great producing females. The bull calf by Statesman could very well be your next herd bull. Pay close attention to this one.

Wilks Regiment 9035 bull calf born on 12-18-24.

Great made, moderate Resource daughter that I admire for her structure, The 599 is a staple for raising those thick ended power bulls. The Barbara K cows are producers.

Sitz Feat 729H bull calf born on 1-22-24.

Very stout featured, big boned, heavy muscled Incredible daughter from a prolific Valor daughter, she has breeding leading growth and performance data. Take note, these Incredible daughters are hard to find and not generally offered for sale. Here is a great opportunity with a herd bull prospect at side by Regiment.

Hard working Pathfinder Discovery daughter that is a flush sister to our high gaining bull and member of the Champion Pen of 3 Angus Bulls at the 2018 Midland Bull Test and was selected by Krebs Ranch, NE.

# Bid Online

**DVAuction**  
Broadcasting Real-Time Auctions

Can't make the sale? Bid from home with DVAuction's "real-time" internet bidding service at [www.dvauction.com](http://www.dvauction.com).

---

## **BID ONLINE IN THREE EASY STEPS!**

1. Create an account at [www.dvauction.com](http://www.dvauction.com) under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab **at least 24-hours prior** to the auction. A DVAuction representative will notify you once you have been approved.
3. Tune in for the sale and make your purchases!

---

After the sale, contact the sale manager or owner to arrange transportation and payment. High speed internet is required for successful bidding. Be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

**Proxy Bidding.** If you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest

**Having Troubles?** During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also be reached at 402-474-5557.

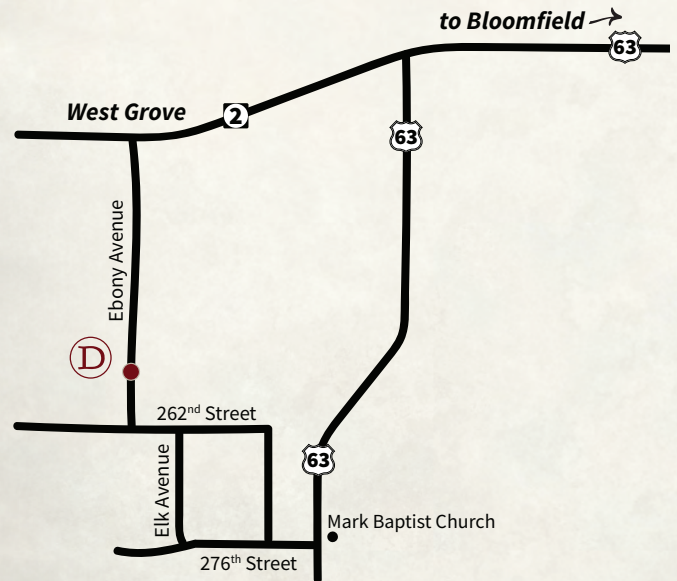

Videos on all lots are available online at  
[www.dvauction.com/events/206643](http://www.dvauction.com/events/206643)  
View the catalog and videos today!
