

MIDLAND BULL TEST

April 4-5, 2024
COLUMBUS, MT

500+ Feed Efficiency Tested Bulls
Angus • Charolais • Hereford • Red Angus
Salers • Simmental • South Devon

TESTING THE POSSIBILITIES...

What criteria distinguishes animals held in high regard? I remember the old-fashioned way – recognition only came through progeny; with consistent sons and daughters proving those genetics in production. These days, many operations are captivated by “fresh, cutting-edge” genetics from animals that haven’t had time to prove themselves. In true American fashion, we have lost reliability

in trying to do more in less time. In this rush, some seem to skim past the fundamental basics such as structural soundness, maternal

instinct, and frame capability. We believe these phenotypic signs must be present to support the genomic data prediction in order to achieve predictability. This tool of predictability is only useful and reliable when the actual, real evidence validates the prediction. These basics – still recognized by the keen eye of experienced cattle(wo)men

through years of calculated observation – provide the solution to the current dilemma of an increased demand on a shrinking cow and herd size, soaring land prices and input costs with narrowing margins.

Why choose Midland?

Proof. We aren’t marketing a “possibility” here. **We are proving – through years of long-term selection – that you can keep structural soundness, frame size, weaning weight, mothering, milk, breed back, and you can have it all with efficiency and gain.**

Residual Feed Intake (RFI) the most accurate reflection of efficiency – is independent of phenotypic traits and MUST be measured. Even the most astute eye can’t spot efficiency, and efficiency has a significant impact on profitability. Without measuring RFI you are only assuming, and assumptions can take you down an expensive path. Take into consideration two sons of the same sire, relatively the same initial body weight. One bull ended with an RFI of nearly *negative* 4.7 and gained an average of just over 5 pounds

per day (**higher gain on less feed**), while his half-brother logged an RFI of over 5 and gained approximately 4 pounds per day (**lower gain on more feed!**). The difference is almost 11 pounds of dry matter intake daily. Retaining daughters for long-term use would have a profound effect on your input costs based solely on your bull choice. You aren’t going to find an EPD or a \$ value on a mother cow that independently raises a calf, year in and year out, with no human intervention, but if you stack those types of mothers and you stack efficiency in your pedigrees, you’re going to see the validation as your profits grow, and your inputs decline.

The Midland Bull Test validates projected expectations in the data we collect and publish. Use our information with confidence to select bulls that not only fit your criteria, but will help advance your herd and your bottomline. We’re helping you put all the pieces together.

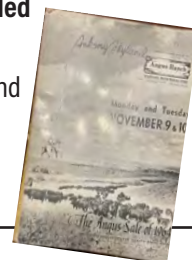

In closing, an astute cattleman and great friend, TJ Gabriel recently shared with us an excerpt from the 1964 Ankony Hyland catalog that rings true today, across all breeds:

CORRECT FUNDAMENTALS

- Written by Clayton Jennings in 1964 and published in the Ankony Hyland catalog

“Some cattlemen either cannot or will not recognize correct fundamentals in an unfitted bull. **We have found that the time-tested successful commercial breeders are among the shrewdest judges in selecting great breeding bulls.** They can and will recognize correct fundamentals in a thin bull; and are willing to pay good prices. WHY? Through his years of successful operations, he has had lots of bull experience. He has bought fat bulls and watched those same bulls get thin. Sad and costly breeding experiences have been his best teacher. He has bought well-conditioned bulls and has been impressed with their development, liveability and breeding performance. **YES, THE PRACTICAL CATTLEMEN ARE LOOKING FOR AND DEMANDING THE VERY FUNDAMENTALS THAT HAS MADE THE ANGUS BREED THE GREATEST BEEF BREED IN THE WORLD.** They are looking for and demanding red meat, bully bulls, with lots of natural thickness throughout the barrel, great depth of body and good legs with plenty of the right kind of bone. **We believe he is entitled to these fundamentals.** He is willing to sacrifice on some other fundamentals if necessary. He is cautious and hard to fool on the fads and extremes that creep in and out of the breed. We need this kind of cattlemen and many more to fully develop the great potential of the expansion of Angus cattle.” - **Clayton Jennings, 1964**

...PROVING EFFICIENCY

MIDLAND BULL TEST

FINAL SORT BULL SALE • APRIL 4 & 5, 2024

102 CONSIGNORS • 500+ BULLS • 23 STATES

WEDNESDAY, APRIL 3 | Join us at Midland Bull Test to view sale bulls and enjoy complimentary hors d'oeuvres and social from 3-7 p.m.

THURSDAY, APRIL 4 | Join us at the New Civic Center 5 p.m. Social hosted by WRS

6 p.m. complimentary dinner | Live music from Exit 53 7-10 p.m.

Complimentary lunch served both sale days at Midland Bull Test.

APRIL 4TH

Charolais • Hereford • Salers
Simmental • South Devon

SALE DAY PHONES

(406) 322-9911

(406) 322-9044

For Bidding Only

SALE INFORMATION

SALE ORDER: Determined by Midland Bull Test Index (1/4 ADG + 1/4 NR + 1/4 YR + 1/4 ER) and Estimated Sale Value. We do expect small changes in sale order. Be sure to check immediately prior to the sale for the most recent updates. Sale orders will be posted online and available sale day.

TERMS ARE CASH: All purchases need to be settled on the day of the sale. When making settlement, please leave specific instructions for transfer of registration, brand/health and shipping at checkout. Each animal will be sold to the highest bidder with the auctioneer settling any dispute as to bids.

Announcements made from the auction block take precedence over any printed material. Livestock will be cared for following the sale at the buyer's risk and responsibility.

CERTIFICATE OF REGISTRY: A transferred certificate of registry will be furnished to the Buyer for each animal after settlement has been made.

HEALTH: All cattle will be sold according to the health regulations of the State of Montana. Buyers must be aware of any variations between the laws of the states.

All bulls have tested BVD-PI negative and are tested negative for known genetic defects as detected by pedigree per respective Associations as of 3/1/24. Bulls sold into states that require trich test will be trich tested after sale and trucking arrangements will be made in short order.

CANADIAN BUYERS: Estimated health inspection costs for first bull purchase is \$650*. Each additional bull is \$250* per bull. Midland will split this cost equally with buyer for health inspection and testing. *Total subject to change. Balance due in full via wire or credit card before health testing will begin.

EFFICIENCY TEST: A collection of data that identifies ratio of the optimum balance between intake and gain. See page 12 for more information.

FERTILITY TESTED & GUARANTEED: Complete semen and scrotal evaluations on all bulls are performed by Lacey Farhmeier, DVM and Jesse Olsen, DVM, MS, both of Absarokee, MT. Scrotal measurements for Group 1 (G1) were taken early-February. Group 2 (G2) were taken the end of February. All are published as actual size. For projected sale date size, add 1 to 1.5 cm per month. These bulls sell guaranteed to be breeders via natural service.

1/3 REVENUE SHARING SEMEN INTEREST:

Some breeders have elected to retain semen interest in their bulls. The buyer will have full possession and full salvage value. The seller, if he/ she desires to collect semen, will do so in the off-breeding season at the seller's expense and the buyer's convenience. If the buyer opts to participate in semen sales, then buyer and seller will work out a mutual agreement. Over the years it has been Midland's experience that most sellers do not exercise this option on bulls going into commercial herds.

DELIVERY: Cattle purchased in our sale will be delivered to CENTRAL locations, such as stockyards, in the lower 48 states. We will attempt to get bulls as close to you as possible. Drops will occur at central locations related to the majority needs for that particular load. Please see page 6 for our delivery policy, map and costs.

RISK: Everyone attending the sale does so at their own risk. The owners and Midland assume no liability, legal or otherwise, for any accidents which may occur.

SEMEN COLLECTION:

ORigen.....(406) 348-2345

World West.....(406) 628-7510

TERMS & CONDITIONS: All sales are being conducted under the American Angus Association Suggested Sale Terms and Conditions (6/04/2020) regardless of breed of sale bull. At Midland, we equally value and appreciate our consignors and buyers; and we are cognizant of the risk incurred by both. With a commitment to mitigate and minimize risk for both parties, **Midland has implemented a modified bull guarantee.** Mortality Insurance will be available sale day through Dakota AG Insurance, Jared Mohnen (605) 999-4475. Buyers who desire to guarantee bulls (insure), must initiate coverage at check-out following the sale. Midland Bull Test is offering to pay 50% of the cost of a 12 month policy covering Full Mortality. **The total cost of coverage is 7.7% of the purchase price, to be split between Midland Bull Test and the buyer (a minimum of \$250 premium: minimum \$125 to Midland, \$125 to buyer).** We think it is a very fair and complete coverage and it will be the only loss of use breeding guarantee offered by Midland Bull Test.

Dakota AG

INSURANCE

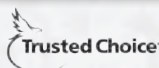

Livestock • Equine • Farm & Ranch • Crop • LRP • PRF

As a service to our valued customers,
Midland Bull Test will pay 50% of
the total premium on this 12-month
Individual Livestock Policy Coverage
Option from **Dakota Ag**
Insurance for the first year!

(You must elect to this policy on sale day to take
advantage of the 50% premium payment from
Midland Bull Test.)

Coverage: The coverage provides traditional, full mortality for death from natural causes or humane destruction as a result of a life-threatening injury.

Coverage Examples: Death for any reason, severe stifles, broken legs, severe foot rot and we have to euthanize the animal, severe sickness and we have to euthanize the animal or any other major injury where we have to euthanize the animal.

Indemnity/Payout: Pays 100% of the value of the cow or bull in the event of death or humane destruction as a result of life-threatening injury.

Term: Renewable 1 year policy options available only.

Age: 91 days old to 6 years of age.

Rate: 7.7% annually. \$250 minimum premium applies to each policy.

Claims:

1. Claims must be reported to Dakota AG Insurance immediately following the discovery of the claim.
2. All mortality claims made to the company must have a veterinarian evaluation and will require a post mortem examination by a veterinarian.
3. Call Dakota AG Insurance immediately upon the discovery of the claim at (605) 990-5355 or 1-800-334-4525.

DIRECTIONS

MIDLAND BULL TEST

5 BULL DRIVE • COLUMBUS, MT

FROM BILLINGS TO MIDLAND

- Take I-90 west, towards Butte.
- Take Exit 426 at Park City, turn left onto Hwy 10.
- Midland is approximately 11 miles from Park City, first left past mile marker 7.

FROM THE COLUMBUS SUPER 8 MOTEL TO MIDLAND

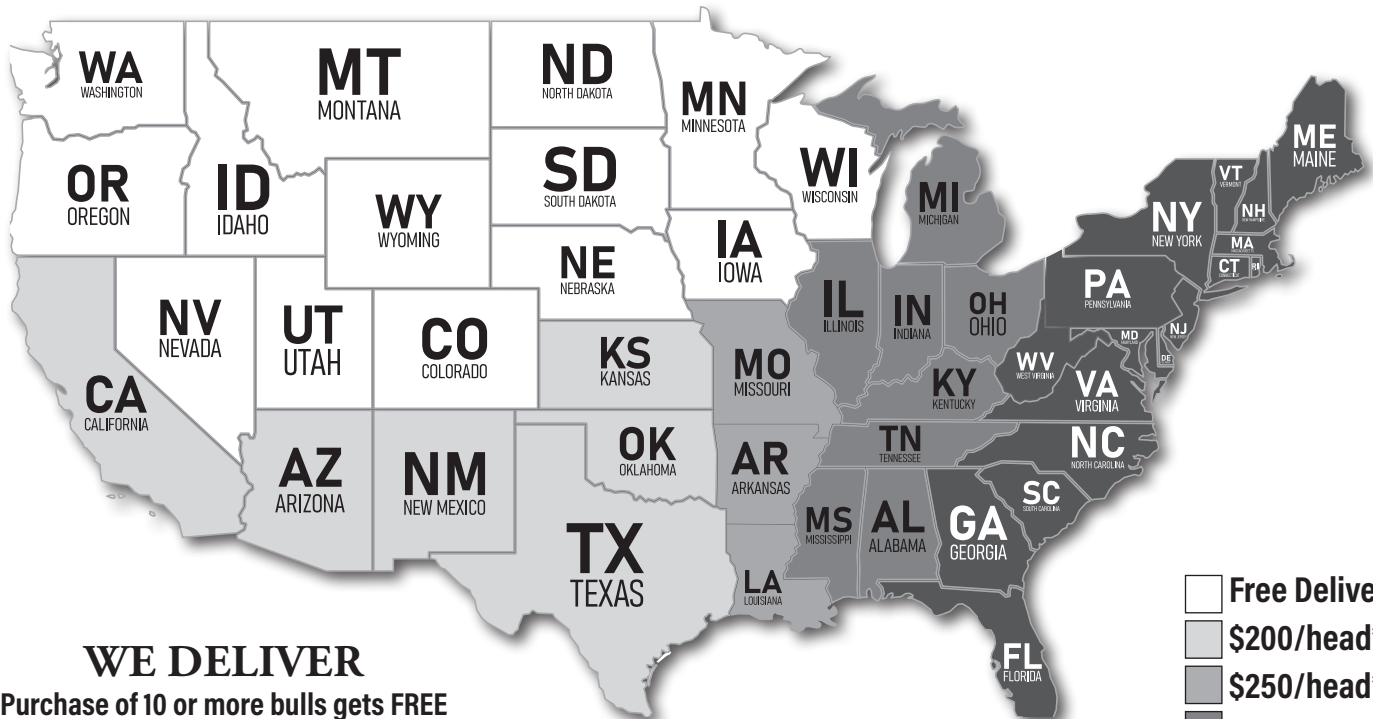

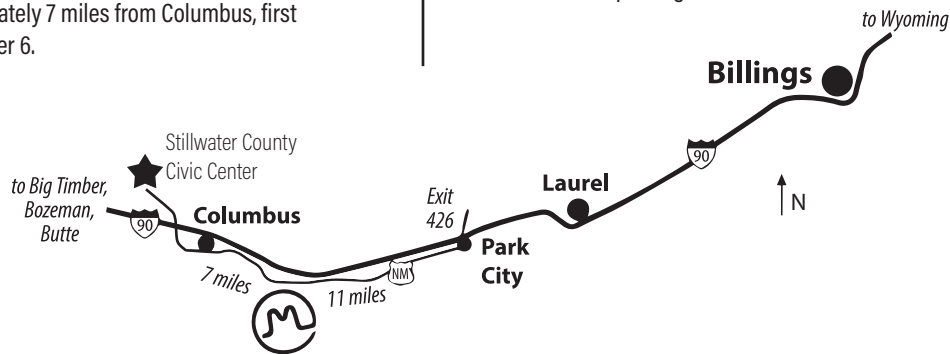

- Go south on N 9th St/ MT 78.
- Turn left onto E Pike Ave/MT 78, this turns into Hwy 10.
- Midland is approximately 7 miles from Columbus, first right past mile marker 6.

STILLWATER COUNTY CIVIC CENTER

16 SHEEP DIP RD. • COLUMBUS, MT

COMPLIMENTARY MIDLAND BANQUET AT STILLWATER COUNTY CIVIC CENTER IN COLUMBUS

- From Midland Bull Test go west towards Columbus on Hwy 10.
- In approximately 6 miles, take a right on N 9th St.
- Travel Approximately 1.1 miles, past Town Pump and under the I-90 overpass.
- Follow the bend left onto Sheep Dip Road and turn right into the parking lot of the Civic Center.

WE DELIVER

Purchase of 10 or more bulls gets **FREE** delivery in the continental US.

All deliveries are to a central point. Drops will occur at central locations related to the majority needs for that particular load.

- Free Delivery
- \$200/head*
- \$250/head*
- \$400/head*
- \$500/head*

*Prices subject to change

Our Sincerest **GRATITUDE:**

We are only the average of the people we spend the most time with, as famously stated by motivational speaker Jim Rohn, and it is with deep appreciation that we pause to reflect and recognize the team and the support responsible for our success.

We are fortunate to have close family connections to remind us of where we came from and push us to succeed in today's times. For us, raising children is a fervid engagement and our village is instrumental in this endeavor. Our **"CLAN"** is ever evolving, and we are most proud of the brightness each of them shed in this world. **PAPA LEO AND GMA SAM** continue to provide us with strength. They both help in balancing us through the rocky patches with love, food, and listening. **GMA JEAN, OUR BOOKKEEPER AND REPORT CARD MONITOR**, attests to our honesty, emphasizes an open-mind and ensures us to move UP at the same time we move forward. She tackles our messiest duties and develops a lasting system that we can appreciate repeatedly. While we don't share the same blood, our friends are valued as if they are our family. **MATT, OUR FEED TRUCK DRIVER/HEAVY EQUIPMENT EXTRAORDINAIRE** has contagious happiness, and aside from an occasional outburst loading the tub, he always has a smile and a bright attitude. He is so easy to be around and the calmness he spreads brings us such relief. It is hard to believe someone could compete with Steve's work ethic. How we are fortunate enough to have double that ethic on our team and in our lives is one of our greatest blessings. **LISA, OUR HERD HEALTH MANAGER**, has NO quit. She doesn't leave until EVERY job is done. The jobs here are often endless. As you can imagine, that could be overwhelming, but no end in sight doesn't decrease her drive a bit. While the office is warm and less physical, the mental load of customer service, education, technology and data management is exhausting. **MELISSA, OUR FRONT OFFICE FACE**, is a fast learner and helps us stay caught up on the things that take a lot of time. We love that she is flexible and jumps in outside for ultrasound, bedding and sometimes pure craziness. We are always looking for fresh, independent, responsible, additions and we fortuitously added **MEGAN, PART TIME HERD HEALTH SUPPORT**, to our crew late in the season. She is a local prize with a plush background in hard work, cattle management and business operations. Megan balances our noise by bringing a controlled quietness to the mix. Our passion for cattle care and improved management is what connects us to the extensions that provide expert care beyond our abilities. **LACEY AND THE STILLWATER VET CREW** put in a plethora of lengthy, demanding days assessing and treating every bull. We value her consistency to ensure each interaction is thorough despite long lines and hectic schedules. We have no shortage of experts here, and it is so much fun helping **SAM ENGLAND, OUR ULTRASOUND TECH**, capture all her ultrasound images. She brings us new updated knowledge and we enjoy the warmth she emits amongst the chaos that comes with gathering individual data on large groups of animals. **TANNER JENSEN** and his crew share this quality as well. They make the chaos of clipping hundreds of bulls in a very short time frame look calm and effortless. We love that he is so tolerant of the petting zoo that neighbors the clipping facility, and he always saves time to share his company and catch up. We would love more time to visit with **OUR CATERER, MELISSA**. We treasure her commitment to coming back every year, despite the tremendous task of nurturing our customers with delicious meals and excellent service for 3 solid days. She has single-handedly reduced our sale stress by 50%! When we are swimming in stressful data, **SHEYNA STROMMEN, OUR PUBLICATION GENIUS** provides the same type of aid by organizing and creating beautiful, easy to read pieces that convey our excitement and expertise. She is gold through and through and we are proud to have her on our team as a friend. In the running for one of the most thankless jobs in this region is brand inspector. We applaud **PAUL YENNY, OUR LOCAL BRAND INSPECTOR**, for his truly authentic devotion to keeping us on the right side of the law with countless inconvenient trips on short notice. And last but certainly not least, our deepest thanks to our annual **SALE DAY ALL STAR TEAM** that always shows up when we need the extra hands. They are always ready for a challenge, and we appreciate their smiles and commitment to making every sale better than the last!

GROUP#: Bulls are denoted as G1 (group 1) or G2 (group 2).

CLASS#: Breeds with more than 40 head on test will be indexed in two birth weight classes. Class 1 = low birth bulls. Class 2 = average/above average birth weight. The split will be determined by birth weight averages per breed and by EPDs as of Feb. 1

CONT#: Number of calves in this contemporary group with-in herd that are the same sex, managed alike and exposed to the same environment.

DOB: Birth Date

TATTOO: Ear Tattoo

REG#: Registration number given by respective Associations.

CAB: Meets the EPD requirement of +0.65 for Marbling and +55.0 for Dollar Grid Carcass Index (\$G) to be considered Certified Angus Beef.

ANGUS GS: Angus Genomic Selection. An advanced high density Genomic testing option, designed specifically for Angus cattle including potential markers for future trait selection.

HD50K: A genotyping platform that replaces i50K, designed specifically for Angus breeders. Delivers GE-EPDs, indexes, parentage verification and genomic percentile ranks

Semen Interest to be retained by consignor

EPDs (EXPECTED PROGENY DIFFERENCE): The bull's pre-weaning growth. EPDs - The prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. You cannot compare EPDs across breeds. Each breed association calculates that breed's EPDs. See breed averages below.

CED/CE: Calving Ease Direct is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

BW: Birth Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

WW: Weaning Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

MILK: Maternal Milk EPD is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

YW: Yearling Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires

Other Production, Carcass and Ultrasound EPDs vary among the breeds, see below.

MARB: Intramuscular Fat EPD is a predictor of the difference in a sire's progeny for percent intramuscular fat in the ribeye muscle compared to other sires. (Angus, Red Angus and Simmental give ultrasound derived EPDs)

REA: Ribeye area EPD is a predictor of the difference in square inches of ribeye area of a sire's progeny compared to the progeny of other sires. (Angus, Red Angus and Simmental give ultrasound derived EPDs)

FAT: Fat thickness EPD, expressed in inches, is a predictor of the difference in external fat thickness at the 12th rib of a sire's progeny compared to the progeny of other sires. It includes the weighted average of 60% of the rib fat measurement and 40% of the rump fat measurement. (Angus, Red Angus and Simmental give ultrasound derived EPDs)

SW: Weaned Calf Value, an index expressed in dollars per head to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves.

SB: Beef Value is an index expressed in dollars per head to predict the expected average difference in future progeny performance for post-weaning and carcass value compared to progeny of other sires.

PRE-TEST ANIMAL DATA:

BW: Actual Birth Weight

WW: Actual Weaning Weight

205 WT: Weaning Weight Adjusted to 205 Days.

NR: Nursing ratio, an index of the adjusted 205 day weight within the breeder's herd only. It is an indication of the dam's maternal performance and the bull's pre-weaning growth.

DAM PRODUCTION: Number of calves and average NR of those calves reported over dam's lifetime.

MGD PRODUCTION: Number of calves and average NR of those calves reported over granddam's lifetime.

FINAL TEST REPORT

ADG: Average Daily Gain.

ADG RAT: Average Daily Gain Ratio. 100 is average.

365 WT: Calculated using FBW and FBW date following BIF calculation guidelines.

YR/365R - Yearling ratio. Index of 365 Day Weights within class. 100 is average.

WDA - Actual Weight Per Day of Age (Lifetime ADG).

RFI - Residual Feed Intake. Actual feed intake minus expected feed intake. RFI is given here in the test data, complete efficiency test results are available at MidlandBullTest.

RFI EPD - (Vytelle EPD) Residual Feed Intake EPD, calculated for each individual animal based on their phenotypic RFI values and pedigree information. Lower RFI EPDs are more favorable.

DMI EPD - (Vytelle EPD) Dry Matter Intake EPD, calculated for each individual animal based on their phenotypic DMI values and pedigree information. Animals with lower DMI EPDs tend to eat less.

EFF RAT - Optimizes balance between performance and efficiency. It measures how efficiently the caloric content of feed is converted to pounds.

FINAL WT - Final Test Weight.

MBT IND: Combined ADG Ratio, Nursing ratio, Yearling ratio and Efficiency ratios (1/4 ADGR + 1/4 NR + 1/4 YR + 1/4 Efficiency Ratio)

SCR - Scrotal Circumference measured in centimeters by the veterinarian.

Watch the Sale Live

www.CCI.live - Broadcasting Live

(405) 400-9505 schedule@cci.live
Over 35 years in livestock marketing!

STEP 1 - CREATE AN ACCOUNT AND REQUESTING BIDDING CREDENTIALS

You can always view an auction without signing in. You must only sign in if you plan to bid on cattle. If you plan to bid on livestock, you must CREATE A NEW ACCOUNT and then request for bidding credentials at cci.live. Once you are approved the first time, you do not need to go through the process for each sale. Please DO NOT wait until sale day to request bidding credentials, some sales require approval more than one day ahead of time. Some sales also require a "bidder passcode" from the sale management for that auction. When you create an account, please use a valid email address. If in the future, if you forget your bidders password, you can reset it immediately through the email on your account.

STEP 2 - GET A BUYER NUMBER

Once you are an approved bidder at CCI, you simply go to the SALE SCHEDULE PAGE and click on the auction name that you are interested in, then click BID ONLINE and click GET BUYER NUMBER. You will instantly be assigned a buyer number, for that auction. Some sales also require a "bidder passcode" from the sale management for that auction. When you click "get buyer number" you will be instructed to enter the passcode from the sale management for that auction.

STEP 3 - ALWAYS REFRESH YOUR SCREEN if you are going in and out of service and if you "leave" your computer or the app for over 15 minutes. The computer may log you out if you have not been active for a period of time. It's always a good idea to refresh your screen right before the sale starts. Driving and bidding is not recommended!

IMPORTANT BUYER TIPS: BIDDING AND SCREEN PRICE - VERY IMPORTANT!!!!

Please note that the asking price on the screen is REAL TIME! Screen or asking price takes precedence over audio and voice! This means that if you have a slow internet connection the auctioneer may be a few seconds, behind the screen price that is showing. The screen price is the asking bid at the auction and there is no delay, so you can bid with confidence by watching only the screen asking price. If you have a slow internet connection, we recommend that you turn off the audio and only watch the asking price box. The audio and video are for entertainment purposes only. You can also phone in to place your bids if you feel that your internet connection is not acceptable.

Always refresh your screen periodically, especially if you move in and out of service.

Always refresh your device, if you have left it for over 20 minutes or return to the app after leaving it.

IF I FORGET MY PASSWORD

If you forget your password, simply click on FORGOT PASSWORD and CCI will email you a reset password link to your email inbox.

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the Certified Angus Beef® brand.

Only 1 in 4 non-parent Angus bulls qualify.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

For more information on Targeting the Brand™ visit CABcattle.com.

FEED SAVINGS ASSOCIATED WITH USING A LOW RFI BULL

INTRODUCTION

Feed costs can be as much as 70 percent of a beef producer's total production costs. Residual feed intake (RFI) is a measure of feed efficiency that explains the difference between what an animal is expected to eat and what they actually eat, for a given level of body weight, growth and production. Cattle with low RFI values are more efficient and eat less than expected while cattle with high RFI values are less efficient and eat more than expected. With its moderate heritability and independence of body weight and growth, selection for RFI can result in more feed efficient animals that require less feed while achieving the same level of production, growth and body composition. Testing and selecting cattle for RFI and using genetics from sires with low RFI expected progeny differences (EPDs) can result in significant feed savings over time. The scenarios below show the feed savings associated with using low RFI sires with varying RFI EPDs and expected breeding values (EBVs).

SCENARIO 1

A rancher purchased Bull 1 from a seedstock producer that had been selecting for RFI for 2 years. The rancher plans on using the bull for 4 years. Estimated feed savings over the 4-year period:

- Bull 1 RFI EBV = -0.08
- Bull 1 RFI EPD = -0.04
- Bred to average cows with RFI EBVs = 0
- Each year the bull sires 20 calves; 10 heifers and 10 bull calves
 - 7 of the heifers are kept as replacements
 - 13 calves are sent to the feedlot
- Feed cost = \$0.13/lb DM

With an RFI EBV of -0.08, Bull 1 will eat 0.08 lb DM/day less than the average bull. If the bull is bred to an average cow with an RFI EBV of 0, it's progeny will eat 0.04 lb DM/day (based on EPD) less than progeny from an inefficient or average RFI bull. This will equate to feed savings associated with maintaining the bull itself, as well as savings with feeding the replacement heifers and feedlot animals.

TABLE 1. FEED COST SAVINGS USING BULL 1 FOR 4 YEARS

	NUMBER OF ANIMALS	PER YEAR FEED COST (\$/LB DM)	REDUCTION IN FEED INTAKE (LB DM)	TOTAL SAVINGS (\$)
Maintaining Bull	1	0.13	117	15.18
Replacement Heifers	7	0.13	1,635	212.58
Feedlot Animals	13	0.13	468	60.84
Total Savings:				\$288.60

As seen in Table 1, over the 4-year period, Bull 1 will save the rancher \$288.60 in feed costs alone when compared to feed costs of an average bull. Savings in feed costs will continue to be increased if the rancher chooses to breed the replacement heifers with another low RFI bull. With several years of selection, the feed savings associated with a bull can be increased drastically, as shown below in Scenario 2.

SCENARIO 2

A rancher purchased Bull 2 from a seedstock producer that had been selecting for RFI for 15 years, hence the improvement in the RFI EPD (seen below). The rancher plans on using the bull for 4 years. Below you can see how much can be saved in feed costs over the 4-year period, given the following assumptions:

- Bull 2 RFI EBV = -1.0
- Bull 2 RFI EPD = -0.5
- Bred to average cows with RFI EBVs = 0
- Each year the bull sires 20 calves; 10 heifers and 10 bull calves
 - 7 of the heifers are kept as replacements
 - 13 calves are sent to the feedlot
- Feed cost = \$0.13/lb DM

With an RFI EBV of -1.0, Bull 2 will eat 1.0 lb DM/day less than the average bull. If the bull is bred to an average cow with an RFI EBV of 0, its progeny will eat 0.5 lb DM/day (based on EPD) less than progeny from an inefficient or average RFI bull. This will equate to feed savings associated with maintaining the bull itself, as well as savings with feeding the replacement heifers and feedlot animals.

TABLE 2. FEED COST SAVINGS USING BULL 2 FOR 4 YEARS

	NUMBER OF ANIMALS	PER YEAR FEED COST (\$/LB DM)	REDUCTION IN FEED INTAKE (LB DM)	TOTAL SAVINGS (\$)
Maintaining Bull	1	0.13	1,460	189.90
Replacement Heifers	7	0.13	20,440	2,657.20
Feedlot Animals	13	0.13	5,850	760.50
Total Savings:				\$3,607.50

As seen in Table 2, over the 4-year period, Bull 2 will save the rancher \$3,607.50 in feed costs alone when compared to feed costs of an average bull. Again, the savings will continue to increase if the rancher chooses to breed the replacement heifers with another low RFI bull.

CONCLUSION

By selecting for RFI, or introducing several low RFI bulls into your herd, feed-related savings will continue to increase. Several years of genetic selection will improve the baseline feed efficiency of the ranch and savings will continue to transfer to the cow herd as replacement heifers are retained.

MARY MCDONNELL VON FORELL SCHOLARSHIP

Each year we award one **Junior Consignor with the high performing bull from all breeds** with a \$500 scholarship from our family. This scholarship is named in remembrance of Mary, Steve's aunt and Leo's sister, who passed away from cancer. She is dearly missed. She was a huge supporter of youth.

***Note:** "High performing" is measured by top indexing bull over all breeds.*

If you are looking for a phenotypical standout with performance, excellent feet, big scrotal, and out of a Hoover Dam daughter. This bull is for you. • Selling 2/3 interest and full possession.

Son of our resident herd sire, by SAV Resource 1441. His calves come easy with excellent growth. He has been a phenomenal breeder. Makes exceptional females with a stacked pedigree to add performance. His dam produces low birth weight calves that will breed back early year after year. • Selling 2/3 interest and full possession.

This bull's dam is a long, thick and deep bodied cow with lots of volume and capacity. She has excellent udder and teat quality. An easy cow to work with. His sire's daughters have excellent udders and small teats. She stands on a solid well designed hoof on all four. • Selling 2/3 interest and full possession.

This low birthweight bull comes from a family known for consistently producing low birth weight high growth calves. His dam, 2XL LGL Lilly 9226, is a beautiful, moderate-framed cow with a nice udder and great feet that produces phenotypically standout calves, including a 2023 Midland graduate with 109 MBT ratio.

Our 13 year Mistress 125 cow keeps producing Midland graduates. Multiple sons and daughters highlight programs through out the country for their ability to produce easy fleshing, perfect uddered daughters that are built perfectly from the ground up. This herd bull will make picturesque daughters and pounds heavy calves. • Selling 2/3 interest and full possession.

SALE ORDER FOR THE FINAL SORT IS DETERMINED ON CALCULATED RESULTS

Midland Bull Test offers commercial cattlemen and seedstock producers a unique opportunity to select top end bulls from around the country based on objective, economic data. When developing the sort criteria, Midland kept the success of the commercial cattlemen at the forefront of our operation, utilizing practical data to make the sale order for the Final Sort Bull Sale. Midland gathers and provides more data and information than anyone in the business, then we also help sort and sift that data for your needs. Bulls are sold by breed and MBT index from top to bottom.

This is a typical Renovation son which means he has bone, muscle and body capacity. His dam has an excellent udder and is a consistent producer of quality calves. • Selling 2/3 interest and full possession.

The dam side of this pedigree brings elite maternal traits while the sire adds excellent carcass traits. The scan data confirms this bull will improve carcass genetics. The dam has an excellent udder is fertile and a easy fleshing cow. • Selling 2/3 interest and full possession.

Heifer bull! Female maker that will moderate size without sacrificing growth. Dam was a great cow, ran on the rough desert of Utah into her teen years, producing three MBT graduates with a ratio of 106. She weaned 11 calves, all AI sired on the first try. Fertility bred in! • Selling 2/3 interest and full possession.

Out of the maternal powerhouse Sitz Barricade, expect this bull to make good footed females that will last. The dam of this bull is from the great Deppe Angus program that is known to make functional females. Maternal value is bred in on both sides of this pedigree. • Selling 2/3 interest and full possession.

Big growth with good carcass traits and great ultrasound data to match! 5.34 IMF, 14.7 Ribeye. Out of a moderate framed cow that is sure to hit pathfinder status this year with another stud calf on the ground now!

The cow family this guy comes out of is impressive. Pedigree looks cool, but this line of cows in our herd really put it into practice. Great udders, special mothering instincts and ability.

Our herd is predominantly black so the ratios will not do the females justice. These calves wean off equally to their Black Angus peers. The granddam of this bull recently died at 18 years old and had a 2023 calf and was bred back to calf this spring.

Note: Note for the MJB South Devons: These bull calves were indexed against each in their own contemporary so 1/2 of each group was below average. We only enrolled the best producing cows as the rest of the 150 cows with bull calves were sold last fall. Add 10 to the nursing ration for a realistic number.

PROVIDING THE MOST ACCURATE CARCASS DATA FOR YOUR HERD DECISIONS.

Dakota AG

INSURANCE

Livestock • Equine • Farm & Ranch • Crop • LRP • PRF

Individual Livestock Policy Coverage Option

Mortality Only Coverage: Pays 100% of the value of the cow or bull in the event of death or humane destruction as a result of a life-threatening injury. Age: 24 hrs of age - 10 years of age.

Individual Equine Policy Coverage Options

Mortality Only (\$5,000 emergency colic surgery included), Major Medical & Surgical, stallion Infertility (Accident, Sickness & Disease), Prospective Foal Coverage & more!

Farm & Ranch

We insure all sizes of farm and ranch operations throughout the Midwest. We have access to every major carrier in the United States, don't hesitate to call an agent for a **FREE-NO OBLIGATION** quote today!

Livestock Risk Protection (LRP)

This new & exciting subsidized coverage option offers protection against unexpected future declines in the market value of cattle and swine. Coverage is available for Feeder Cattle, Fat Cattle, Swine and Unborn Livestock as long as the livestock are born before the SCE end date. *Unborn Livestock Definition:* Livestock not born on the effective date but expected to be marketed before the end date.

Livestock Specified Perils, Livestock Herd Coverage

This policy option provides coverage for losses caused by death or humane destruction of livestock as a result of a specified peril. Coverage is for both owned and non-owned livestock in your care, custody, and control.

Perils Covered: fire – lightning – explosion or smoke – windstorm, hail or tornado – smothering by blizzard or snowstorm – collision with vehicles, aircraft or falling objects – riot, civil commotion or vandalism – earthquake or volcanic eruption – flood, drowning, mudslide or tidal waves – accidental shooting – electrocution – attack by wild dogs or animals – collapse of buildings, barns, bridges or culverts – sinkhole collapse – hypothermia due to precipitation – leakage of gas or anhydrous ammonia – contaminated feed or water.

Available Endorsements: coverage in transit – grazing poisoning – livestock born during the policy period – frozen semen & embryos in storage or transit.

Rainfall Pasture, Rangeland and Forage (PRF)

Covers pasture, rangeland, or forage for perennial haying and/or grazing purposes. It was designed to help protect a producer's operation from the risks of forage loss due to the lack of precipitation.

Other Available Insurance Options:

Prospective Offspring Coverage (Pregnancy) – Trucking – Feedlot – Short-Term Cattle Coverage – Frozen Semen & Embryo Endorsement (Storage & Transit) – Single Trip Transit Coverage – Cargo Coverage & More.

Call an agent today to attend your annual production sale or to obtain a free, no obligation quote on all of your insurance needs!
