

RUDA CATTLE

Bull Sale
april **11**
2024

12:30 PM / WEST POINT SALE BARN, NE

Welcome to the second annual bull sale at Ruda Cattle. We are extremely excited to bring you what we believe is a high quality yet diverse set of bulls that can work in many different scenarios across the industry. We consider it an honor to have your interest in our program and do our best year-round to try and bring you cattle that can help increase your bottom line. I'd like to make a few points of interest on the bulls. These bulls were developed on a forage-based diet with little grain to ensure the integrity of their feet and legs and promote longevity in their ability to cover cows because we know a bull investment should last for several years, not one. The two-year-old bulls were run on pasture all summer with no added inputs and we feel you will be pleased when you put them to work. We appreciate your interest and hope you like them. Please feel free to reach out with any questions or give us a call to stop by and look.

*God bless,
Ruda Cattle*

SALE SCHEDULE

Prior to sale call or text any time to view bulls.

WEDNESDAY, APRIL 10

Cattle will be available for viewing at the sale barn

THURSDAY, APRIL 11

8:00 A.M. Bulls Available for viewing

12:30 P.M. Ruda Cattle Bull Sale

SALE CONTACTS

Stewart Harbin 706.835.8615

Chad Ruda..... 402.720.9978

SALE LOCATION

West Point Livestock Auction

839 S Colfax St, West Point, NE 68788

SALE DAY BIDDING

You can bid in person, by phone, by leaving a bid with a sale contact or online at CATTLEUSA.COM.

TERMS

Cash or check payable immediately following the sale and before the removal of any animals unless prior arrangements have been made.

CARE OF BULLS & DELIVERY

Ruda Cattle will keep and feed all bulls until May 15th if you so choose. We will continue to care for them as our own but take no responsibility for loss or injury and recommend you purchase mortality insurance if left in our care. We will deliver all bulls within 300 miles free of charge.

SEMEN INTEREST

Ruda Cattle will retain 25% semen interest on all bulls sold, meaning if we would like to collect a bull for in herd use we have the option to do so at our expense. The new owner will have full possession and salvage value.

GUARANTEE

We fully guarantee all bulls to be reproductively sound. All two-year-old bulls have passed a breeding soundness exam and all yearlings left in our care will be semen tested before pick up on May 15th. We also guarantee all bulls for the first breeding season. (90 Days after turnout)

From the first time we laid eyes on our Phoebe donor when she was just a calf, we knew she was going to do great things for our program. Her first calf by W/C Night Watch was a really nice bred we sold this past December and this stud here is just her second calf. I usually don't like to make any bold predictions about newborn calves but I think this calf was all of about 24 hours old when I said this is the best bull that's ever been born here. Fast forward one year and in my mind that hasn't changed. This bull has intrigued and impressed me every day of his life. I think this is one incredibly good individual that has as bright of a future as anything we have ever raised. Come see him in person, I know you will love him.
Selling half interest. Call to discuss terms.

If you've been paying attention to the Simmental breed the last couple of years then you are well aware of how hot the red thing has gotten. Here is your chance at one unique red baldy purebred bull. He's got all the basics of being sound structured, good footed and plenty of muscle. Plus, he gives you the added bonus of balance from the side and length of neck. Unfortunately, we lost his sire this summer in just his second year of service so these genetics will be scarce. Get in while you can.

12.7	1.1	75.6	103.5	22.1	122.4	78.0

Another nice red baldy bull with an outstanding pedigree. He's sired by the ultra-popular Bank on It bull that sold at Wernings a couple of years ago and who I feel is one of the most consistent sires we have used in the last few years. This is a bull that will continue to get better every day of his life and will look killer as he matures.

Lot 4 is the first son we have ever offered out of SWC Red Wave, but we are sure excited about what that bull is doing for our program. Without a doubt he is one of the best red calving ease options on the market today. I think his progeny will continue to garner attention over the next several years and I think this son can bring a lot of value to a multitude of operations.

These two half-brothers really emulate what the Dew North sired cattle do so well. They are both built incredibly well from the ground up and are functional in their overall design. 7 is the stouter made and bigger bodied one of the pair who is sure to transmit plenty of growth and power. However, if you need to add a little more look and balance from the side take a glance at lot 8. He is the longer necked, cleaner chested bull and really neat in his lines.

They say patience is a virtue and I think that would apply here. This Foresight son is built as good as you can make one with tons of look and quality from the side. He's just a little later maturing than some of the others but with a little time and patience I think this bull will look like an absolute stud. Plus, he is a grandson of the famed Tammy donor from the Boyert program who continues to knock it out of the park year after year.

KCC1 PRODIGY 272H - SIRE OF LOT 11

When I think of a bull being dual purpose lot 11 is what I envision. This baldy bull is built exceptionally well from the side. His heck ties high out of his shoulder, he balances up as good as any and is level hipped. The cool thing about this guy is even though he should sire awesome looking replacements, his added size, length and muscle shape should translate into more valuable feeders as well.

RUDA MR Profit 3051L

In case you couldn't tell we put a bunch of these embryos in two years ago and they all came out bulls. It would have been nice to have a heifer or two to replace the 6Y cow but after seeing these bulls develop I was sure happy with how they turned out. They are a very consistent set of brothers that genetically go back to some of the really good cow families in the breed. Any of these Quantum Leap sons can easily stand on their own, however if you are looking for two or more bulls to kick on a bigger group of cows then here you go. Kick out a couple of these guys together to keep the calves uniform and increase growth.

The cattle sired by our Right Now son have continued to impress us year after year. They might not always be the flashiest set but top to bottom they are one of our most consistent sire groups. Bid with confidence on this guy.

Here is a really solid numbered bull that is long bodied and heifer safe. For a calving ease bull he still has really good growth. 2161K is a very balanced bull that can work in multiple scenarios.

Lot 30 has been one of my favorite bulls to watch develop this fall and winter. Every time you pass this set of bulls it seems like he always stands out. He's stout boned, wide constructed and has plenty of muscle. Combine this with his look from the side and baldy face and he's sure to be a sale day favorite.

Don't overlook this stud just because he's at the back of the book. Truly one of the most complete two year olds on the sale. Low birth weight, calving ease bull out of a really nice purebred Angus cow. He's built as fundamentally sound as you can make one. We have a running discussion around here on if people actually read footnotes or not. If you are the winning bidder on this bull only, find Chad or Stewart after the sale and mention that you read this footnote for a one hundred dollar credit on this bull.
