Darrell & Frina Kaiser ▪ 6051 County Road X ▪ Park, KS 67751  
Home: (785) 754-2334 ▪ Darrell: (785) 673-3357 ▪ Frina: (785) 673-9785  
dfkaiser@ruraltel.net ▪ www.KaiserAngus.com

Friends,

Welcome cattle producers to the 2024 Kaiser Angus Production Sale. With beneficial winter moisture and the current cattle market, Kaiser Angus is very excited about the future of the cattle business.

In this offering you will find a nice balance of maternal, high growth, carcass merit bulls for your evaluation. We are pleased to keep improving our ET program and this year is no different. You will see several full siblings because of the ET program. These full siblings will allow multi breeding programs the genetics for high consistency calves.

Kaiser Angus values our past customers and friends in the cattle industry. We look forward to meeting future customers and friends as well. Hope to see you and your family at the ranch on April 4th!

Sincerely,

Darrell Kaiser Family

**DVAuction**  
Broadcasting Real-Time Auctions

www.dvauction.com

We are pleased to bring you real-time bidding & a live broadcast of this sale through DV Auction. To watch or bid online, simply complete the following steps:

- Visit the DVAuction web site at [www.dvauction.com](http://www.dvauction.com)
- Click on the "Register" tab.
- Enter a user name, password and your contact information.
- Click on "Apply for bidding."

Select the sale from the list of other auctions and click "Apply". Complete the process by filling out the banking and lending information requested. Be sure to include a personal contact at your bank, and we will contact them in order to get a credit reference. If you would prefer to be approved using your credit card, call (402) 474-5557. Please be sure to apply for bidding at least a day in advance of the sale. Every effort will be made to process your application in a timely manner. For application questions, please call Roxane at (402) 649-7946 or Kate (402) 649-8048.

# Kaiser Angus

ANNUAL PRODUCTION SALE · THURSDAY, APRIL 4, 2024 · 1 PM

## SALE DAY PHONES

Darrell Kaiser	(785) 673-3357
Frina Kaiser	(785) 673-9785
Luke Kaiser	(785) 754-8048
Zoe Kaiser	(785) 673-8076
Matt Caldwell	(913) 755-1105

## SALE LOCATION

From Quinter Exit: 5 miles west on County Road Z, 2 miles south on County Road 62, 1/2 mile west County Road X.

From Park Exit: 2 1/2 miles south on County Road 58, 2 miles east on County Road Z, 2 miles south on County Road 62, 1/2 miles west on County Road X.

## AUCTIONEER

Justin B. Stout (913) 645-5136

## PRESS REPRESENTATIVES & RINGMEN

Matt Caldwell, Sale Consultant (913) 755-1105  
Jeff Mafi, *Angus Journal* (816) 344-4266  
Guy Peverley, *The Stock Exchange* (785) 456-4390  
*If you are unable to attend the sale, please contact any of the sale staff or register to bid online at [dvauction.com](http://dvauction.com)*

## ACCOMMODATIONS

Best Western, Wakeeney, KS (785) 743-2700  
Castle Rock Inn & Suites, Quinter, KS (785) 754-3600

## LUNCH

A complimentary lunch will be served sale day starting at 11:30

## PERFORMANCE DATA & ANGUS GS

All of the individual performance and Angus GS data is included in the epd's. The EPD'S are the most accurate tool for selection. If you would like to see the actual performance and Angus GS data we will gladly share it with you. All cattle selling are free of known genetic conditions.

## TERMS & CONDITIONS

Cattle sell under the standard terms and conditions as recommended by the American Angus Association.

## INSPECTION OF THE CATTLE

The sale cattle and the cowherd are available to be seen anytime at the ranch. Please call ahead.

## LIABILITY

All persons attending the sale do so at their own risk. The owners or sale staff assume no liability, for property loss or accidents that may occur.

## HERD HEALTH

All bulls have been vaccinated for IBR, BVD, BRSV, PI3, 7 way Clostridial. They have also been wormed and poured. Tested negative for BVD-PI.

## DELIVERY

All purchases will be delivered at no charge to your ranch or farm within 300 miles. Pick up your bulls sale day and receive a \$50/head discount.

## BREEDING GUARANTEE

All bulls sold through the sale are guaranteed to be satisfactory breeders for the first breeding following the sale. A breeding season is defined as the 90 day period following the first turnout of the bull.

All bulls have been given a breeding soundness exam by Dr. Paige Grothusen, Butterfield Trail Veterinary Service. Breeding soundness exam includes general physical examination, examination of the testes and measurement of scrotal circumference, genital tract examination, collection and analysis of semen samples. Actual scrotal circumference was taken February 23, 2024. If there is a reproductive problem, please contact us immediately and a replacement bull will be provided if available, or a credit equal to the animal's purchase price, minus salvage value, will be issued for the replacement of one animal. This guarantee does not cover illness or death of the animal.

## BULL DEVELOPMENT

Fall bulls are weaned mid to late April. We background them for 60 days to assure herd health. Then they are turned out on native grass until early November to let them grow in their natural environment. From November until sale day the bulls are on a high roughage diet to condition them for breeding longevity.

As the Lot 1 feature and high-selling bull, Kindred was the highest RADG, \$Grid, \$Beef, and \$Combined sire in the 2023 Kaiser Angus Ranch sale. He lands in the top 1% for several \$Values including 400+ \$C who offers moderate stature, foot improvement, and admirable calving ease.

Kindred captured attention at Kaiser for being one of the best Fireball sons with his combination of CED, Hair Shedding, Heifer Pregnancy, \$G, and \$C. Aside from his elite EPD profile, Kindred offers a captivating presence and can be used to add efficient growth and Grid premiums.

## MAKE YOUR CATTLE STAND OUT

You've made a significant investment in your genetics, but does the market recognize that? Stand out by differentiating your cattle with AngusLink<sup>SM</sup> programs: AngusVerified<sup>SM</sup> and the Genetic Merit Scorecard<sup>SM</sup>. AngusVerified validates your calves are sired by registered Angus bulls and make your cattle stand apart from other black hides on sale day. The Genetic Merit Scorecard gives buyers the confidence they need to pay more for your quality calves.

Users of the AngusLink programs earn **\$13-15/CWT PREMIUMS** on average. Give us a call, and learn how to claim your competitive edge with AngusLink value-added programs.

The Genetic Merit Scorecard and AngusVerified are administered by IMI Global.

# ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

## *Aim High*

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef*® brand.

### *Minimum Genetic Requirements*

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

**Only 1 in 4 non-parent Angus bulls qualify.**

For more information on Targeting the Brand™ visit [CABcattle.com](http://CABcattle.com).

# AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

**Expected Progeny Difference (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

**Accuracy (ACC)**, is the reliability that can be placed on the EPD. Accuracy will range from 0 to 1 with an accuracy closer to 1.0 indicating higher reliability. Accuracy is impacted by the amount of information that is included in the analysis including individual genotype and performance records as well as number of progeny and ancestral records.

## PRODUCTION

**Calving Ease Direct (CED)**, expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Residual Average Daily Gain (RADG)**, feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for post-weaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

**Dry Matter Intake (DMI)**, expressed in pounds per day, is a predictor of difference in transmitting ability for feed intake during the post-weaning phase, compared to that of other sires.

**Yearling Height (YH)**, expressed in inches, is a predictor of a sire's ability to transmit yearling height compared to that of other sires.

**Scrotal Circumference (SC)**, expressed in centimeters, is a predictor of the difference in transmitting scrotal size compared to that of other sires.

## MANAGEMENT

**Claw Set (Claw)**, expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes compared to another sire.

**Foot Angle (Angle)**, expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth compared to another sire.

**Docility (DOC)**, expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

**Pulmonary Arterial Pressure EPD (PAP)**, expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

**Hair Shed EPD (HS)**, expressed in units of hair shed score, with a lower EPD being more favorable. This indicates a sire should produce progeny who shed their winter coat earlier in the spring and has improved environmental adaptability in heat stressed areas and grazing endophyte-infected (hot) fescue.

## MATERNAL

**Heifer Pregnancy (HP)**, is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

**Calving Ease Maternal (CEM)**, expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk (Milk)**, expressed in pounds of calf weaned, is a predictor of a sire's genetic merit for milk and mothering ability in his daughters. In other words, it is the part of the calf's weaning weight attributes to milk and mothering ability.

**Mature Weight (MW)**, expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

**Mature Height (MH)**, expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

## CARCASS

**Carcass Weight (CW)**, expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

## \$VALUE INDEXES

**\$Value Indexes**, expressed in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

**Maternal Weaned Calf Value (\$M)**, expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning by decreasing mature cow size and improving docility, foot structure and fertility while maintaining weaning weights consistent with today's production.

**Weaned Calf Value (\$W)**, expressed in dollars per head, provides the expected difference in future progeny pre-weaning performance from birth to weaning.

**Energy Value (\$EN)**, expressed in dollar savings per cow per year with a larger value being more favorable. It assesses differences in cow energy requirements, due to maternal milk and mature cow size.

**Feedlot Value (\$F)**, expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle through the feedlot phase and sell on a carcass-weight basis.

**Grid Value (\$G)**, expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

**Beef Value (\$B)**, expressed in dollars per carcass, represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

**Combined Value (\$C)**, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.
